Prominent Physician Gives Warning Against Cancer

UNIVERSITY OF OREGON, July 26.—One's life may depend on the prompt medical examination of a mole, skin blemish or lump, painful or not, according to the warning given in an address here by Dr. Joseph Colt Bloodgood, noted authority on cancer, who is making a tour of the country as part of a campaign of education against the spread of that scourge which claims eighty thousand American lives each year.

Dr. Bloodgood, who is professor of surgery at Johns Hopkins medical school, declares in brief that cancer can always be prevented if taken in time but can rarely be cured. Prevention is his slogan.

Following, in brief, are his words of warning:

"For the smoker: 'Cancer of the lip, tongue and mucous membrane, of the tongue and cheeks, attacks adults who use tobacco in any form and who have ragged, dirty teeth. The combination is the cause; and the combination is unnecessary.'"

"For persons with skin marks: 'Warts and moles and other abnormalities of the skin can be divided into three groups.'

"1. Those which should be removed at once, because they are of the kind which frequently develop into cancer."

"2. Those skin defects, like little red birthmarks, and things like freckles, in which cancer practically never develops, and to which no attention after the first examination need be given."

"3. Those skin defects which should be watched and removed if they show any sign of growth, weeping or ulceration."

For women: "Cancer of the uterus attacks the mothers of our children. It is largely or entirely due to the neglect of the proper repair or healing of the injuries due to child-bearing. There is much evidence that cancer of the uterus is a preventable disease. It is certainly largely curable if recognized at once."

"A lump in the breast of any woman over 25 years of age should receive immediate medical examination."

For every adult: "When you know you are sick in your insides, go to your family physician and demand a thorough examination with the X-ray and other laboratory methods."

"A surface sore that is 'ripe' is, if it should happen to be cancer, 'ripe' for death and not for cure."

Harvesting has begun around Cecil, but no definite report is at hand at time of writing, regarding quantity or quality of wheat. However, judging from the expressions on several farmers' faces seen in this district, they have nothing to boast of. Second crops of alfalfa are being cut and are cutting off fine.

RESOLUTIONS OF CONDOLENCE

Hall of Holly Rebekah Lodge No. 129, I. O. O. F.

Whereas: Another link in our chain has been broken, and a beloved sister has been called to that mysterious beyond of which we know naught, save as the teachings of our Order lead us to believe that a well spent life shall receive its reward by a great and beneficent Creator in the great unknown hereafter. As Sister Rowena Gentry, by good acts and deeds endeared herself to us in our associations in life, so we believe she will receive just reward beyond, where we hope to meet in eternal life.

Therefore, be it resolved: That in the death of our beloved sister, Rowena Gentry, we have lost a valued member and friend; and we deeply deplore her loss to our fraternity, her family and friends.

Resolved: That a copy of these resolutions be spread upon the minutes of our Lodge; a copy thereof sent to the family of the deceased and a copy to the Heppner paper and Pacific Old Fellow, and that out of respect to her memory our charter be draped for the period of thirty days. Fraternaly submitted,

NOTICE TO ALL WATER USERS

Water users of the city will take notice and strictly observe the following: Owing to low water, irrigation will have to be governed by the whistle. Shut off when the whistle blows the second time. Will give as many hours as possible.

Do not irrigate without using a nozzle or sprinkler. When fire alarm is sounded, shut off all irrigation that all pressure may be retained for fire fighting.

By observing these rules the water supply for the city will be ample for all uses. CITY OF HEPPNER. By W. E. Pruyn, Water Sup't.
