MORROW COUNTY OFFICIAL PAPER Foreign Advertising Representatives THE AMERICAN PRESS ASSOCIATION

ALSO WE "FLOW DEEP WHILE SLUGGARDS SLEEP"

FEW people are aware of the fact that when news was received here last evening that the state senate had followed the lead of the house in passing the survey bill for the Umatilla rapids project we heard of an event almost epochal in its importance. Time is quite likely to prove that this little measure, enacted without discussion and without any recognition whatever by the press of Portland, is the most far-reaching measure of the present session.

The passage of the bill means that we are to have an official survey of the project, financed jointly by the state and nation. It will be the first time in history a Columbia river power and irrigation project has been so surveyed. The state once made a survey of power possibilities at Gellie but it was not a federal survey and thus far it has accomplished nothing.

For over 100 years the white man has lived in the region of the great Columbia and has done nothing to develop this resource in the northwest. We have one of the greatest power streams in the world, and have not been using it. We have been neglecting a gold mine. We have been allowing good power to go unharvested while the O. W. & N. Co. annually spends \$5,000,000 for coal, the people paying the bill. We are allowing hundreds of thousands of acres of arid land to go unfarmed when the Columbia river has ample water for it and the power to place that water on the land.

The situation has been a reflection upon the ingenuity and intelligence of the northwest. Many have long realized this but nothing was done about it until the Umatilla rapids association, managed chiefly by Penistemonians, has been on the job and it has made headway.

The association has done what has never been done before—it has enlisted the interest and the practical help of the federal government. Government officials, acting informally, have agreed to survey the project provided the state bears half the expense and that state aid has been granted by the legislature. This means we get the federal survey, the first actual federal survey of a Columbia river project. We are farther along than we hoped to be in such a short time. We are farther along with this project than is the Columbia basin project although the Columbia basin people have spent pennies.

It is the judgment of the East Oregonian that the battle in behalf of this great project is now half won. Often the initial steps in any enterprise are the hardest. Once we get the snowball started and it gathers strength by its own momentum. We have the ball moving in good shape and when we get the official survey, financed jointly by the state and nation, the Umatilla rapids project will have an enviable status. It will then be ready for construction and it will be constructed. The project will be constructed because use of the Columbia is inevitable. God intended the river for our happiness and man has the brains to make use of his opportunities. The world is moving swiftly along the line of hydro electric development. Everywhere it is being recognized that our power resources must be used. It is in the cards to build our project and we are likely to have actual development much sooner than we expect.

Pendleton has a right to a thrill of pride for the part it has taken in behalf of this move. At times we are twisted by neighbors who think this is a mere lip burrah town that makes a big noise three days in the year. That may be true but it is also a fact that sometimes we "flow deep while sluggards sleep." It so happens that the town that produces the greatest outdoor show in the world has also done more than any other town towards advancing a big visioned move to hasten progress in the northwest and to enrich our neighbors as well as ourselves.—East Oregonian.

WOOL GROWERS TOOK RIGHT VIEW

BY A VOTE that was almost unanimous the National Wool Growers' Association voted down an inconsistent and unsound resolution advocating the admission of more Spanish and French Basque sheepherders. It was inconsistent, because the wool growers have been brought back to prosperity by the American principle of protective tariff.

The double purpose of the protective tariff is to benefit American labor and American enterprise against excessive and detrimental foreign competition. The National Wool Growers' Association would have cut a sorry figure before the nation if it had gone on record for free trade in cheap labor. The point was well stated by James A. Hooker of Utah, when he said: "We must be fair to labor if we want labor to be fair to us. We asked Congress to protect us with a tariff, and we have no right now to ask Congress to lower the bars and give us cheap labor."

The rejected resolution was unsound because it sought to increase a danger that should be diminished. Good government, our very institutions, are in danger from an excess of undigested foreign immigration. Much of the immigration that has been pouring into the United States in the last quarter of a century has been undesirable and dangerous. We are now putting up the bars that should have been raised 25 years ago, and should keep them up.—Spokane Spokesman-Review.

IN COMPUTING federal income taxes for the year 1922, taxpayers are allowed the following exemptions: Single person, or married person not living with husband or wife, \$1000; head of a family, or married person living with husband or wife, \$2500, unless the net income is in excess of \$5000, in which case the exemption is only \$2000; for each dependent under 18 years of age or incapable of self-support, \$400.

DRASTIC LAW ON BOOT-LEGGING.

A NEW law passed by the present legislature and signed by Governor Pierce, should go far to making moonshining and bootlegging unpopular in Oregon. Any person found guilty must be imprisoned from 30 days in the county jail up to 3 years in the state prison, and a fine which ranges up to \$3,000 also may be imposed.

In a way this law is an answer to those who have derided prohibition, maintaining that it has not made the state dry. The people do not propose to cease their efforts to stamp out the manufacture and sale of moonshine. The course followed in Kansas, one of the first states to make prohibition really effective, is thus to be followed. Penalties are made more stringent and better means provided for enforcement.

The people of the state undoubtedly want prohibition. They have had enough of the open saloon and the first has gone but the second has tried to take his place. He has had a pretty sorry time of it for several years, but his trade now becomes so dangerous that he will think twice before engaging in it.—Enterprise Record-Chief.

TO THE GLORY OF WOMANHOOD.

NO GREATER tribute has ever been paid to the women of America than is found in the calm analytical report of the University of Wisconsin which dispassionately discloses the fact that widows and self-supporting mothers sent 153 sons and daughters to the University this fall to join the freshman class. Mothers registered 83 sons and 60 daughters. Now learn the story of the self-sacrifice of these mothers. One hundred and twenty-five were housewives, 5 were nurses, 3 dressmakers, 3 milliners, 2 matrons, 2 stenographers, 1 a dramatic critic, 1 a librarian, 1 a chaperon, 1 musician, 1 retired farmer, 1 club manager, 1 business woman, 1 caterer, 1 hotel proprietor, 1 saleswoman, 1 beauty operator, 1 camera and finally, one a telephone operator. Truly of such mothers as well as children is the Kingdom of

Heaven. Fathers who sent boys to college embraced a variety of the most mental callings. Such is the American melting pot. Such is the hunger for education to provide education that will fit the rising generation for better things than father or mother ever knew. From the seeds of sacrifice may come to us in a single generation development that will spell a newer and a better America. Let these youngsters not forget.

ABOLISH TAX FREE SECURITIES.

THE farmer who desires relief from high taxes should ally himself with the movement to restrict the exemption of bonds from taxation. The popularity of tax free securities has encouraged public works on an unexampled scale, and the diversion of wealth into channels which cannot be taxed, has in turn increased the burden upon the property owner.

TROUBLES. THERE wouldn't be no troubles, if the people didn't tell 'em,—but some ain't satisfied, unless they speak of what's befall 'em. . . . You ketch a chimney-corner fall of weather-bound com-mo-ter, and, nineteen out of twenty, you would class as trouble-shooters. . . . The Widder Hanks has got a case of chronic digestion.—The neighbors knowed it all around, afore they asked a question. She passeded out her innard pangs to every saint 'n' sinner, till most of 'em has got afeard to eat their Sunday dinner! And Old Bill Sipes has croaked about rheumatics in his system, till

one of us can understand how we have ever missed 'em. . . . In fact I limp a few myself, right after Sipes's visit.—It may not be the rheumatics, but what the thunder is it? I wish they'd pass a law, begosh, that hit the trouble-slinger,—not any common, legal job,—but a regular bum-dinger! I'd want a law to functionate—a little sort of killin'!—Tough, tough, tough that sort of fate, I reckon I'd be willin'.
