ABOUT TOWN BUILDING.

BY RUCHARD LLOYD JONES. HEN Chicago burned, its bankers

want builders were in despair, un-til its iomizing real estate operator, who at the time was in California, was reached by wire with the ques-tion, "What shall we do?" The one word enewer care back, "BUILD," it was that faith in the future that re-walls the inter-company automatic. made the inter-ocean metropolis.

Every city is as great as the faith of its staunchest citizens. No great-er. The real asset of a city is not its past but its future.

Complicency is as deadly to a com-munity as to an individual. The town that waits he be discovered has hard-ly a gambler's chance of growth. The town that has discovered itself has opened future's door to greatness. The city that would find for itself a future must utilize the NEW and not the old. Each age demands improve-

ment on the past.

The merchant who so respects ancient methods that he ignores the newest ideas in merchandising must lose his load to the merchant who is eager to employ the last in salesman

The town that holds fast to obso lets ideas and ideals surrenders su-premacy. The community that ex-pects to fall by secident into industrial greatness through no effort of its own, has a child-like faith in mod-ern miracles, and has as little chance outh who, by wishing, would see the

will. Imagination precedes the architect's pencil in its course, but the mason must follow that tracing ere the castle in air is anchored to earth. Entitical laws are at easential to life and the growth of things as physical laws. The flower unfolds according to a well-ordered plan. Town problems are merely the common problems of individuals. The town that is without plan or purpose, without its without plan or purpose, without plan or purpose purpose, without plan or purpose, without plan or purpose, without plan or purpose purpose. lems of individuals. The town that is without plan or purpose, without ideas and ideals, is as coloriess and as hopeless as the individual whe

that allows personal wants to warp commounty iteals, and low aims to thwart high aims, handicaps its chances of being bigger and better.

Many winds

chances of being bigger and better.

Many minds are wiser than one mind. We create instruments of government, develop boards of commerce and clubs dedicated to civic interests to pool the intelligence of thinking minds. Secure is the town whose destinites are curved out by the common judgment of minds endowed with the enthusiasm of common sense.

So with the town. The community that is eager to be better is destined to be higger, healthier, wealthier, and COVERNMENT COST

be a deeper civic interest manifest among our thoughtless and spend; the spending of the reduce the present wage their people.

If the annual governmental expenditure was paid in labor instead of in money, every worker in the United States would be giving up as his or lier share, more than seven weeks of work every year.

In other words, there are too many milners for the needed amount of coal, and so the public must earry the burden of the idle time. When there are too few workers the public pay, the sent abroad for the world war. If

We could understand this economic operation if there were any law compelling a man to be a coal miner, but as there is not, it would seem that the coal business is being conducted with really scientific inefficiency and a total distregard of the public. The robbing of the people this year is little short of flagrant grand larreny.

We rould to meet the bill for a single year. Conting the average family as five persons, the actual cost of government is about \$400 per family per year. All of which cames as a result of lack of interest in public action on the intelligent understanding of a businesslike people. We could understand this economic

It is big enough to hold all of the quarreling countries of Europe and then some.

It is an opulent country, possessing more wealth, natural resources and gifts from God than all the other countries put together.

All the mines, forests and oil wells across the sea are not worth half the value of American optimism. Quarrels and wars over material wealth kill the spirit of humanity.

America has vast wealth; yet by far its higgest asset is its hopeful and bouyant spirit, its wealth of vision, its big heart, its faith in humanity, its boundless optimism.

A real Amercan lives and breathes big ideas—he sees big mountains and hases, grows big in sympathy and love, binds up the wounds of the afficited and heals the hearts of the first part of the sept Ladder on acct of so he weodent scratch the floor if he wood of fell of the step Ladder.
