FARM POINTERS.
Farm Notes from O. A. C. Experiment Station.

Many Oregon orchards are now reaching an age when the spray outfit, originally purchased are going to be inadequate. As satisfactory scab and worm control cannot possibly be obtained until spray equipment of greater capacity is provided so that the acreage can be covered fast enough to permit accurate timing of the sprays. Failure to time sprays accurately always means lost profits.

The orchard spray program for 1923 can be obtained free on request to the Oregon Agricultural College, Corvallis, Ore. This bulletin gives complete information and the latest advances in spray practices.

The Man Who Signs Must Make Good

RESPONSIBLE man puts his name to a piece of paper and it becomes a check—the equivalent of money.

He signs his name on the back of another piece of paper and it becomes an endorsed note—good for money.

He writes a letter and it becomes a binding contract.

The adding of the name makes these things solemn and legal obligations.

The man who signs is responsible.

Just so with an advertisement—the moment a man signs his name to it he has made a pledge to the public.

He is bound by his word as much as if he signed a check or a note. He must do what he promised on the terms he promised.

ROBBERS!!

Robbers do not disturb people who have nothing. A man with a thousand dollars in the bank and only a check book in his pocket has nothing for robbers to take; yet his check is as good as the money which his neighbor carries in his pocket.

It is not safe to carry money on your person when among strangers. Neither is money safe in the house. Money in the bank is safe and is always available by means of a check book. And this assurance of safety costs you nothing.

We invite you to place your money with us on checking account. We offer a safe and convenient place of deposit.
