A rousing meeting of rodeo fans was held at the council chambers on Monday evening, which was well attended by representatives of the business interests of the community, and the unanimous decision reached was that a bigger and better show would be put on for three days this coming fall.

J. N. Nys was chosen to act as treasurer and W. W. Van Meter will fill the position of secretary, thus completing the organization for the present, and the move for the 1923 rodeo is off with a bang.

Bert Mason, manager of the lone baseball team and mayor of our neighbor city, was present at the meeting, being called to Heppner to make some arrangements for the coming ball game between the two towns.

Cutworms When Hungry Readily Poisoned

Poison Bran Mash Put on Field Before Crop Is Up Is Eaten With Great Relish.

"Cutworms which seriously attack garden crops may be killed off before they have opportunity to injure the plants, by application of a poison bran mash," says A. L. Lovett, in charge of entomological research at the Oregon Agricultural college experiment station.

A formula which will make enough poison bait to treat one acre is bran 15 pounds, lead-arsenate 1 pound, molasses or a cheap syrup, 2 quarts, salt 4 ounces, and enough water to make a coarse crumbly mash.

Lack of green vegetation following preparation of the soil for planting in the spring, forces the worms to fast. They rapidly develop a keen appetite and become seriously destructive to newly set plants, unless controlled.
