NATIONAL HIGHWAYS

Newspaper Association Member No. 1157.

Making of Roads Now Problem for Experts

Making a modern highway involves so many problems that expert engineering, financing and construction all play their part. No longer will a mere cutting down of trees and rough grading a road bed serve the public.

Before a modern highway can be properly and economically built, the taxpayers must ask, and the experts answer, a number of very pertinent questions.

It must be determined what the highway can, and second what it should, cost. Next, and intimately concerned with the first, is the problem of what sum yearly can, and what sum should, be spent for maintenance.

The better the road in the beginning, the less the necessary maintenance, and vice versa.

If the road has several different geographic sections, what types of roads should be built for these? Road built through swamp areas need one type of foundation, that built on

rocky hills, another; some roads require expensive drainage foundations, others do not.

What is the maximum traffic to be provided for? This means planning for the road five, ten, twenty-five years hence, as well as tomorrow.

Broadway, New York, and Washington Street, Boston, were planned for millions loss yearly.

How much shall the taxpayer pay for the road and how much the users? What proportion of upkeep shall fall on the makers of the road and what on the horses, wagons, automobiles and trucks? Tax too heavily, and the road isn't used; tax too lightly, and the taxpayer suffers.

What shall be the location? How much shall be put into reducing grade and curve, and how much into width and length? Not knowing the answers, no citizen can vote intelligently upon road taxes or bonds.

LEXINGTON DEFEATS BOARDMAN

The Lexington squad played Boardman's football team on the former's grounds Friday, and when the score was finally figured up it was discovered that the irrigationists had gone down to defeat by a score of 25 to 0. It is reported that Lexington played most of her second team in this game, and she might have been counting yet if the first team had all been in the lineup.

Boardman is said to have a gritty bunch of players and it is expected that they will yet develop a winning team. They lack in proper equipment and are working to get this when they will be able to put up a better appearance.
