1923 Thanksgiving

THREE hundred and three years ago a band of Pilgrims from the Old Country, "moored their bark on a wild New England shore."

Nine weeks previous this brave band, one hundred in number, fleeing religious persecution, had left Plymouth, England, in their little ship, the Mayflower, and started west across the broad, stormy ocean to the land of freedom.

This was the coming of our "Pilgrim Fathers," and the place of their landing in Massachusetts was known as Plymouth Rock.

Scarcely had these brave pioneers become settled in their new colony when the terrible New England winter was upon them. The suffering which they endured is evidenced by the fact that before the following summer one-half of the party had died.

Nothing daunted, those who were spared, happy in their new-found freedom, stayed on, planted their crops, and prepared for the following winter.

In 1621, the year following their landing, after a good harvest, the Colonists determined on a period of recreation combined with thanksgiving for their many mercies.

The Governor sent out for huntsmen, who on one day secured enough game to supply the colony for nearly a week.

This was the original American Thanksgiving. For two hundred years it continued to be an Eastern holiday, taking place after every fall harvest. Today it is a national custom, the day being observed throughout the United States.

In commemorating this birth of our nation let us remember that it was founded and raised on the Bible; that religion came first and business was a secondary consideration; that the laws of men were based upon the laws of God; and that the church was the first and most important organization of every community.

The best that is in us we owe to these sober, uncompromising, God-fearing New Englanders. And the farther we drift from their stern teachings and tenets, the greater is our danger of shipwreck as a nation and as individuals.

"By Marcus."

Proper Housing Means More Profits In Hog Raising

The Hog needs protection more than most domestic animals, because it lacks natural protection, and is very susceptible to the influence of cold, heat and drafts.

Hog houses should have tight walls, roofs, doors and windows, abundant sunlight, well drained floors and plenty of fresh air without drafts.

They should be strongly built of good materials.

Frame construction meets all these requirements and Tum-A-Lum is recommended because it is carefully and accurately made, is strong, durable, dependable and will give life-long honest service.

Picture of Hog house shown here is only one of many properly designed styles that our architectural department has worked out.

Our detail blue prints and material lists are so complete that building can be done by yourself. These are furnished free with the material.
