MR. BLEAKMAN SPEAKS.

G. A. BLEAKMAN of Hardman is probably the best authority on the Heppner-Spray road project anywhere. He is at home on the road, has studied every inch of it and has been connected with every move taken to construct it. At the last organization meetnig of the Heppner Commercial club he made a very enlightening talk on its possibilities, when he was applauded long and loudly. It was at that meeting that every Heppner business man present promised his loyal support to any move taken toward forwarding the project. In this issue of The Gazette-Times, Mr. Bleakman speaks again. Let's hope that what he has to say this time brings more than a meaningless applause.

It seems hardly necessary to reiterate all the arguments which we have printed previously in these columns, favoring this project. Every Heppner business man is acquainted with the facts. We would, however, like to urge everyone interested in the matter to read and consider Mr. Bleakman's letter, and each one to do his bit toward putting the thing over. As we see it, no one is to be taxed financially, so there is no need for hesitation on this score. All that is wanted is a unanimous support behind a delegation to put the matter up before the state highway commission in an endeavor to get the road put on the state map. This is such a little job for the great benefits that we all know are practically assured to follow, that we wonder at the apparent lack of interest.

Let us second Mr. Bleakman's request for a meeting to be held in Heppner in the immediate future to start action on the Heppner-Spray road project. Now is the best time while the commission has the leisure to give the matter thorough consideration.

SNEAKING RECALL JOBBERY.

ALL surface indications are to the effect that the recall movement organized against Governor Pierce was actuated by the narrowest selfish considerations and is being pursued by disreputable and contemptible methods.

Nothing definite has transpired as to who financed the expensive undertaking. Those who were really responsible for it are skulking behind cover. Their own estimate of their own motives is evidently a low one. They appear to realize they are doing something dastardly and are determined not to permit their own identity to be revealed.

Signatures were obtained by disreputable methods in disreputable neighborhoods and in disreputable resorts, according to what we have been told by petition circulators who, to earn a few dollars, resorted to methods which were to themselves revolting.

Governor Pierce repeatedly evinces that he is worried by the recall. It must be his conscience that is worrying him, for he has nothing to fear from a recall movement originating in slimy motive and organized by slimy method. The people of Oregon resent defilement of their institutions, and prostitution of the recall to pervert practices will be condemned by them by an immense majority at the polls if they ever have a chance to vote on it.

Like other base efforts, conceived in iniquity, this recall movement is having the opposite effect to that intended. It is confirming Governor Pierce's tenure to the full term for which he was elected and is adorning his undeserving brow with the halo of martyrdom.—Oregon Voter.

Proper Housing Means More Profits In Hog Raising

The Hog needs protection more than most domestic animals, because it lacks natural protection, and is very susceptible to the influence of cold, heat and drafts.

Hog houses should have tight walls, roofs, doors nad windows, abundant sunlight, well drained floors and plenty of fresh air without drafts.

They should be strongly built of good materials.

Frame constuction meets all these requirements and Tum-A-Lumber is recommended because it is carefully and accurately made, is strong, durable, dependable and will give life-long honest service.

Picture of Hog house shown here is only one of many properly designed styles that our architectural department has worked out.

Our detail blue prints and material lists are so complete that building can be done by yourself. These are furnished free with the material.

Your car can't wear earmuffs

So fill it up with good "warm-blooded" Zerolene—a "cold-test" oil that flows freely in zero weather—and watch the result—

Your motor will give perfect winter service—easier starting, full power and maximum fuel mileage. And you'll avoid the troubles that usually result from the use of a poor "cold-test" oil—worn bearings, scored cylinders and prematurely diluted crankcase oil.

The Zerolene Correct Lubrication Chart—wherever Zerolene is sold—contains our recommendation of the proper grade of Zerolene for the *winter* lubrication of your car.
