MORROW COUNTY OFFICIAL PAPER Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

THAT LITTLE RED SCHOOL HOUSE

THE BASIS of American life is the public school. Perhaps no institution in our country has inspired more platitudes.

Unquestionably the school lies deep in the interest of the people, yet particularly the people show little activity in combating the weakening of conditions which under our system seem to be robbing the American child of its inalienable rights—the right of equality in education.

Every village in our State is always willing to appropriate monies for a new schoolhouse. America has the finest school buildings in the world in consequence, but our investment appears to be more in bricks and mortar than in brains and understanding.

Stripped of fine phrases, education can be summed up as knowledge, sound education and sound knowledge that enable one to meet and conquer the perplexities of life.

For the last five years great difficulty has been experienced in obtaining capital for railroads, for industrial or development purposes, for the reason that the wealthy owners of such capital are saying their wealth away in tax-free investments.

Like questions might be asked regarding the teaching of boys and girls who find their lives centered in the industrial world.

REVISION of the revenue laws and reduction of taxation will be of no lasting benefit to the country unless the application of that discipline and self-control so necessary to proper development.

Let us wash the camouflage from the walls of the little red schoolhouse and see what it really looks like today.

IT'S GOT US GOING, TOO. FUNNY what different notions folks have. Some think that the hog will root us out of debt.

There are points below which reduction in revenues cannot safely go. Government functions must continue, and their continuance will always cost money.

Drinking coffee kills a man in Pittsburgh, drinking whiskey kills a child in New York, drinking water kills a girl in Texas.

Mrs. Lenin tells the Russian people to build schools and hospitals in memory of her husband, rather than a monument.

Better lock up your heiresses. Another Prince has arrived in New York.

Now She Will Dance THE SECRET OF COMMUNITY GROWTH.

THE Council Bluffs, Iowa, Nonpariel, in commenting on the record growth of that city in 1923 predicts greater progress in 1924.

It cites the fact that local people by an almost unanimous vote extended the franchise of the local gas and electric company with the result that the company now has plans completed which will require an additional investment of \$300,000 for increased service to the consumers.

"What will this mean to the city? Growth and development. This money will be spent in wages and for materials.

"How many people appreciate their proprietary interest in a great many concrete property assets which they do not personally own, such as theaters, churches, schools, auditoriums, parks, stores, hospitals, clinics, street railways, and electric light and gas service? We could not use these properties more to our advantage than we do if we owned them all in fee simple.

"We are only casting bread upon the waters when we boost for our city. We do not need to concern ourselves about who holds title to certain prop-

erties. All instrumentalities which minister to the comfort, service and education of our citizens are assets of the city and its people.

The picture drawn by Council Bluffs Nonpariel is typical of normal American development under a government which recognizes the right of individual growth and activity with a minimum of governmental interference and restraint.

STOP THE LEAK.

THERE is now before Congress an amendment to the federal constitution which provides for taxing the income from future issues of state and municipal bonds, by the federal government.

Commenting on necessity for doing away with tax-exempt bonds in order to encourage the investment and loaning of capital in productive enterprise and agriculture, E. D. Chaswell, Secretary of the Farm Mortgage Bankers Association of America, says:

"Wealthy individuals subject to a federal income tax of 50 per cent to 58 per cent are buying 5 per cent, 5 1/2 per cent and 6 per cent tax-free securities now, at par, or at a very slight advance.

"For the last five years great difficulty has been experienced in obtaining capital for railroads, for industrial or development purposes, for the reason that the wealthy owners of such capital are saying their wealth away in tax-free investments.

"More than a billion dollars is now diverted every year from agriculture and business to tax-free bonds. This is a knife that cuts both ways.

"It is to be assumed that the Treasury Department's estimate of the amount that taxes can be lowered is based on the best estimates possible.

"There are points below which reduction in revenues cannot safely go. Government functions must continue, and their continuance will always cost money.

Poem by Uncle John

We hold respects for the honest guy, which respects he could—but couldn't—but we shun the geezer that didn't try—that said he would—and he wouldn't.

There's allers applause for genuine fire that lofty ambition kindled. . . . But we hiss the spirit that didn't aspire—that shrunk and foiled—and dwindled.

No matter whether we win or not—we never should cease the fighting. . . . The flicker's candle is soon forgot, that blinks when it ort to brighten.
