

Coolidge Ideals, Voiced Years Ago When President Was State Senator Reveal Lofty and Sound Principle

President Calvin Coolidge finds himself during this campaign in a somewhat unique position.

It will be unnecessary for the President, unless he otherwise desires, to prepare voluminous declarations of principle for the education of the voters. He may, to the contrary, rely upon his files and his past performances in offices of public trust for his most eloquent appeal to America's citizens.

After this theretofore obscure young lawyer from Plymouth, Vermont, had by earnest discharge of the duties imposed by divers minor offices in Massachusetts proved his capacity, he was elected president of the Senate of that State. At that time he gave utterance to those tenets for which he has since been a convincing sponsor and they are as applicable now as they were then.

"The welfare of the weakest and the welfare of the most powerful are inseparably bound together," he said, and he continued:

"Industry can not flourish if labor anguishes. Transportation can not prosper if manufacturers decline. The general welfare can not be provided for in any one act, but it is well to remember that the benefit of one is the benefit of all, and the neglect of

one is the neglect of all. The suspension of one man's dividends is the suspension of another man's pay envelope.

It is not necessary to recall to the voter President Coolidge's unconditional declaration for law and order. That has become not only a part of Massachusetts history but part of the archives of the nation. But years before he drastically evidenced his determination that justice should prevail, when he declared in the same inaugural address:

"Men do not make laws. They do but discover them.

"Laws must be justified by something more than the will of the majority. They must rest on the eternal foundation of righteousness. The latest, most modern and nearest per-

That has become not only a part of Massachusetts history but part of the archives of the nation. But years before he drastically evidenced his determination that justice should prevail, when he declared in the same inaugural address:

"Men do not make laws. They do but discover them.

"Laws must be justified by something more than the will of the majority. They must rest on the eternal foundation of righteousness. The latest, most modern and nearest per-

fect system that statesmanship has devised is representative government. Its weakness is the weakness of its imperfect human beings who administer it. Its strength is that even such administration secures to the people more blessings than any other system ever produced. No nation has discarded it and retained liberty. Representative government must be preserved.

"Courts are established, not to determine the popularity of a cause, but to adjudicate and enforce rights. No litigant should be required to submit his case to the hazard and expense of a political campaign. No judge should be required to seek or receive political rewards. The courts of Massachusetts are known and honored wherever men live justice. Let their glory suffer no diminution at our hands. The electorate and justice can

not combine. When the trial of causes goes outside the court room, Anglo-Saxon constitutional government ends."

R. M. Washburn, who was a legislative colleague of President Coolidge in Massachusetts, has become his first biographer, and of him, he says:

"He never forces a controversy, although he is ever ready to take a stand on the issues which come his way. In these days, the typical candidate continues to pursue the voter. He effusively simulates a desire to share his cross. As against him the personality of Calvin Coolidge presents a marked, restful and delicious contrast.

"He has never forgotten that if one would have the respect of others he must respect himself."

defenses of our country? September 12 is designed to answer that question.

Sept. 12 in Our National History. September 12 is a vital day in American history, for it is the day upon which our National anthem, "The Star Spangled Banner," was written by Francis Scott Key, and it falls this year on the anniversary of the great American effort at St. Mihiel in 1918.

When you fall in for your part in the National expression of a virile citizenship tomorrow, you can remember with pride that six years ago American manhood swept the Prussian design for dominion of the world into the discard at St. Mihiel and demonstrated to the world that no end short of complete victory could mark the American effort in defense of democracy and individual rights.

Amusing Incident Results in "Ruggles of Red Gap."

The average Englishman's failure to get the point of the witty sayings of Americans was never displayed more amusingly than in the Paramount picture "Ruggles of Red Gap," to be shown at the Star theatre on Tuesday and Wednesday next. Ruggles, the English valet of Cousin Egbert, the former played by Edward Horton and the other by Ernest Torrence, on his first visit to America is persuaded by his master to ask a certain person what day of the week it happens to be. If he says Tuesday and it is Tuesday Ruggles is to "poke him in the eye." But Ruggles insists that it is Tuesday, and the man is sure to answer in the affirmative. "That's just it," exclaims Egbert marveling at this fellow's densesness. But does Ruggles ask the question? If so, what happens? The picture gives an amusing answer. Don't miss it.
