

Local Happenings

Mr. and Mrs. Dwight Misner, extensive wheatraisers of the Jones country, were here on Tuesday, attending to matters pertaining to the securing of seed grain. Mr. Misner boasts of having about the finest time of any wheat rancher in the county, for Mrs. Misner does all the work, while he just bosses the job. He is authority for the statement that Mrs. Misner has just finished plowing 350 acres on their farm, handles some 38 head of stock, does the housework, etc., and it just naturally keeps him busy to look after the other small details of caring for the ranch, helping to hook up the teams and acting as general superintendent. He is a lucky man.

Mrs. K. S. Rogers has returned to the hotel business after a year and a half spent in Portland. She has taken charge of the Heppner hotel, a large establishment built during the boom times after the war. Mrs. Rogers' many friends believe she will give the hotel the best management it has had since it was built, and expect her to make it pay.—Enterprise Record-Chiefman.

E. J. Keller, village smithy of Lexington, was in Heppner for a short time on Tuesday. These warm days, so springlike, give Ed a feeling that he would like to tie himself to the banks of Willow creek and gather in a few fish. He will have to await the opening of the season, however.

Joseph Ekkelson and Robert Wilcox were in the city on Saturday from Lexington. Mr. Ekkelson is up from his Salem home and spending a week or two at Lexington, looking after his interests there. He is particularly interested in securing seed wheat to be used on his farm.

Noah Clark was here from his Eight Mile ranch Monday and Tuesday. Among many others of his vicinity, he was arranging to get hold of some of the assistance that the state is offering to those in need of seed wheat. The December freeze made it necessary for him to reseed.

Mr. and Mrs. Chas. B. Cox returned home this week from their visit to Southern California. The necessity of looking after the reseeded of his wheat fields made them return a little sooner than they had anticipated when leaving Heppner some six weeks ago.

Mr. and Mrs. John Lundy of Rhea creek were here on Tuesday, making out the necessary papers to secure some seed wheat. They have quite an acreage to be reseeded and will sow some variety of spring grain, providing they can get the seed in time.

Clyde Wells, realtor of Pendleton, was doing business in Heppner for a few hours on Saturday. The firm of Wells & Keithley at Pendleton are moving in the real estate game all the while, and deals call them to Heppner frequently.

Harry Turner is busy getting new seed in the ground at his farm in Sand Hollow. Many farmers out that way are working hard on this job at present, the most of them having about finished.

FOR SALE—One cook stove with hot water attachment, 1 "Hobart" kitchen cabinet, 1 bedroom suite and 1 library table, all as good as new. See Mrs. Alex Green in Heppner.

For Sale, Cheap—Acetylene lighting system completely equipped, Eph Ekkelson, Lexington, Oregon.

David and William Hynd, sheepmen of Sand Hollow, were doing business in the city on Saturday.

Theo. Anderson had business calling him to the city from his Eight Mile farm on Saturday.

Riley Munkers, pioneer resident of the Lexington section, was doing business here on Monday.

Mr. and Mrs. John F. McMillan of Lexington were visitors in this city on Saturday.

George Bradley of Lexington was a visitor here on Saturday.

WILL SHIP FERTILIZER.
W. T. Campbell will shortly receive a machine from Portland that he will utilize for a time in the grinding of sheep manure for shipping to the Portland market. Mr. Campbell will set this machine up at the place of Barney Doherty down in Sand Hollow where he has secured the manure from Mr. Doherty's big sheep shed and corral. This will be ground up and put in sacks, hauled to Lexington by trucks and there placed on the cars. It will require about four men at the plant besides the two men operating the trucks, and Judge Campbell will be handling quite a payroll. He returned from a trip to Portland the past week, where he made arrangements for the disposal of the fertilizer, and says there is a fine market for it, properly prepared. He secured one order for 500 tons, and will be able to get more such orders. At the Doherty corral and sheds there is estimated to be about 1000 tons of the material. The machine can be used for the grinding of various kinds of feed as well.

A Sweet Breath at all times!

FROM THE "MORROW COUNTY FARM BUREAU NEWS"

Farm Bureau Notes.

By R. B. WILCOX
The recent T. B. test throughout the county shows that we have a very small amount of T. B. cows. The disease could be easily almost stamped out if every one with cattle would give the government tester a chance to test their cows. Several facts should be kept in mind about T. B. cattle. 1st. The milk from such cows is dangerous for human use. 2nd. Hogs, chickens and cows and calves that are fed milk from T. B. cows easily get the disease. 3rd. It is impossible to tell from a cow's appearance whether she has the disease or not. The best looking cow in your herd may be suffering from the disease. 4th. The disease does not always confine itself to the lungs, in fact many glands of the cow may be affected. Quite often the cow's udder is badly affected and the milk is full of T. B. germs.

Good pure milk is the best food we have and for the healthy growth of children is absolutely essential. Why take a chance of having the disease among your cattle when a word to your county agent will bring the authorized government tester to your ranch free of charge? It is probable that a small charge will have to be made in the future. It is hoped that another test will be made next year.

The usual bad luck in picking a day for the annual meeting happened again this year. As a result only a small attendance was possible. Many of the things planned for this meeting were postponed to some more favorable time.

Experience of Wasco County wheat farmers has shown that a few sheep

prices usually benefit only those financially able to tide over the low period. Why is it necessary to resort to these cut-throat methods among ourselves when a sane agricultural program intelligently carried out would give all a fair show?

Well, are we ready for some club work in Morrow county? Each and every one has surely noticed that each succeeding month, more space in all our papers throughout our entire country is devoted to the good work being done by our club boys and girls. Thousands and thousands of boys and girls throughout the United States have been at the work for several years. Many of our most successful young people have laid the foundation for their success by a course in club work. Club work is no experiment. It is the biggest successful reality of modern times. Its possibilities are enormous. Its foundation is laid on practicability and common sense. There are three things necessary for club work:

1st. Some boys and girls interested in some line of club work, and most boys and girls are interested in the work or soon become so under the proper guidance.

2nd. A good local Club Leader, some one who understands the work to be done and who is willing to spend a little time helping and encouraging the boys and girls. The majority of

club leaders are school teachers, but many excellent leaders are local people who have special training fitting them for leadership.

3rd. The cooperation and encouragement of the parents is needed so that the children may carry out their work thoroughly and intelligently. If the three conditions mentioned above are available in any community the success of club work is already assured. Our new county school superintendent is especially desirous that you give club work a chance in your community, and if you are interested let her know and she will come to your community and talk it over with you. Our County Agent is always at your service along club work lines. Oregon has one of the best club organizations in the United States and at its head is Mr. H. C. Seymour, a man with many years experience in teaching, superintendency and club work, and he has told us that he will spend several days with us in the near future if we are interested enough in club work to care to do anything in that line. What are you going to do about it? Surely with all these excellent people at your service, with the press of the country unstinted in its praise of the movement, with the most advanced thinkers and speakers in all sections where the work is going on wholeheartedly backing the movement, you will not completely ignore the chance to give

your boy and girl the opportunity to have the same chance the boys and girls of other localities have when everything is free to you and yours for the asking.

On Saturday, February 21, 1925, a farm meeting will be held at the county agent's office. Several matters especially important for the people of Morrow county will come up for consideration. Although nominally termed a Farm Bureau meeting, it is open to all and any one interested in farm problems and agricultural questions is urgently invited to be present. The farm organizations wish your opinion whether you consider yourself a member of the Bureau or not. It is not membership in the Farm Bureau that is uppermost in our minds. But what we can do to make it possible for the great farming and stock raising industries to be more profitably carried on by the rank and file of the great army of honest and conscientious people engaged in these pursuits.

Samples and prices on Grimm alfalfa seed have been sent for by the county agent. If there is sufficient demand, a pool for this seed will be made up and seed ordered. Prices for good seed vary greatly and when the purity and germination tests are taken into consideration some of the cheaper seeds are usually found to be very high priced due to a low germination and being foul with weeds.

WASHINGTON

NOT in the possession of unusual genius, but in the remarkable combination of perseverance and ordinary qualities: exalted idealism—honest courage—broad human kindness—and practical common sense—were George Washington's common assets. Let us always remember Washington, whose birthday we this week observe.

When the little voice of discouragement whispers in your ear—think of Washington. He heard it—it fairly screamed at him. He met reverse—he was forced to retreat at times—encountered failures—but they only inspired him on to greater efforts—and in the end, victory and glory were his.

This bank offers a helping hand to all. Courtesy, cooperation and knowledge based upon many years of experience are offered you here in your struggle for independence and peace.
