Do your buildings shiver? Exposed surfaces need to be covered to protect them from sun and rain, wear and decay. The staunchest of material will rot, rust, or otherwise decay without a weatherproof coat. Paint is the most practical coat and Rasmussen Pure Paint is least expensive - because it covers and protects so much longer. Ask your dealer for color cards. Ask your painter for an estimate. Rasmussen Pure Paints & Varnishes. CREOSOTE SHINGLE STAIN. Rasmussen Creosote Shingle Stain prevents rotting at the base of the shingle for it is absorbed by the shingles, instead of merely forming a coating. The creosote goes right into the pores of the wood, destroys the fungus-moisture growth, and protects against sun and moisture, thereby lengthening the life of the shingles. Rasmussen Co.
