State Board of Health. As far back as 1803, a worker at the Rockefeller Institute...

While this is the cause of cancer, it is still impossible to say it might be, or it might be something to do with the real cause...

In the meanwhile, even the organization should be found to be the cause, we would only be one step further in our knowledge of cancer.

For all so-called "cancer cures" are harmful. Even if they do not make the condition worse, the delay caused by their use permits many a cancer to reach a stage where nothing can be done with it.

The best advice that can be given now is this: For every growing lump, bubbling sore or persistent bleeding, consult a reputable physician at once.
