Bank Credit and Bank Balances

THE average balance you carry in this bank has a great deal to do with the amount of credit extended to you.

When one man wonders why he can't borrow as readily as his neighbor, granting all other factors equal, the reason is probably found in a steady, substantial average balance as against a small, fluctuating account.

It's good business from every standpoint to build up your bank balance, as a bulwark of credit, a bulwark against emergency, a ready capital for business opportunities.

50% of your life is spent within the four walls of your home. Gray, dingy or delapidated, they make every day a disappointment.

But—bright and gay with fresh clean paint and varnish, working and leisure hours are a constant pleasure.

The pleasure and efficiency of those living indoors, justifies the trifling cost of repainting. And the increased value of your property (because it is freshly painted and preserved against delapidation) makes painting an actual saving in money.

Ask your dealer for Color Cards. Ask your painter for an estimate.
