Getting Tired of Tickets

The meeting of Charley Lockwood's Oregon republican union conference last Tuesday, a conference of hard-picked Portland republicans plus a few who sneaked in, proved to be a form of safety-valve for the blowing off of some pent-up opinions as to the function of secret society tickets in primary and general election campaigns.

Sitting on the lid of the meeting was a representation from the federation patriotic societies, including the president of the Multnomah county council of that organization, Edwin L. Keith. It was one of Mr. Keith's first public appearances since his election, an election brought about, by the way, by the strategy of one faction within the federation itself.

During the course of the meeting it became evident that Mr. Keith's political skin has not yet been toughened by any great amount of rough-and-tumble public contact. For following a scathing denunciation of secret election of candidates by unseen groups resulting in minority control of elections, a denunciation which made its appearance in a written speech read by Geo. L. Koehn, unsuccessful candidate for joint representative from the Multnomah and Clackamas counties in the 1922 primaries, Mr. Keith evidenced either a guilty conscience or a touchy epidermis.

"I resent the speaker classing as traitors republicans who didn't support Ben Olcott for governor. Olcott was no better republican than Walter Pierce," loudly asserted Mr. Keith, his face aglow, noticeably perturbed.

"I never mentioned Olcott nor even intimated I had him in mind. I simply cited instances of how things are going under the direct primary," answered Mr. Koehn, a Portland manufacturer, ex-college professor and editor of a war veteran's paper.

"You didn't have to mention Olcott. We knew whom you meant," retorted Mr. Keith. "The class you call traitors are as good republicans as there are in the state."

It will be remembered that the F. O. P. S. organization, which Mr. Keith is the titular head in Multnomah county, endorsed Mr. Pierce and not Governor Olcott in the 1922 election. Yet the representatives of this organization sat in at a republican "conference."—Oregon Voter.

The Home Newspaper

If there is anything in your town worth talking about, ten chances to one your own newspaper had a hand in putting it there. If anybody beyond the walls of your berg ever learns that there is such a place as Three Corners, it will be through the home paper.

Every town gets its money's worth through the home newspaper. It's the wagon that carries all your goods to market. It ought to be kept in good repair. It will pay to grease it, paint it and keep its running gears in good shape and shelter. It is the guardian and defender of every interest, the forerunner and pioneer of every movement and the sturdy advocate of law and order.—The Manufacturer.

A Question of Religion

Apparently we have a religious row in the Philippines, where the Mahometans are in arms because the soldiers broke a holy tank containing miraculous sacred water. The soldiers claim that the people suffering from all sorts of diseases bathed in the tank, with the result of spreading the diseases. This is undoubtedly the truth, but the religious fanatics have caused the death of about 100 others. It will be remembered that the Hindu revolt in India was caused by issuing greased cartridges to the soldiers. These were greased, some by tallow, and some by lard. The Hindus held it was sacrilege to bite any product of the cow, and the Mahometans held it contaminating to bite anything that came from the pig—so there you are.—Ex.

This Little Wheel

Weights 100 Tons

The highest-head reaction turbine in the world has arrived in Portland and is now being installed in the power plant of the \$16,000,000 Oak Grove hydro-electric project of the Portland Railway, Light & Power Co.

The water wheel and accessories weighs approximately 100 tons and it took five flat cars to haul it from San Francisco, where it was designed and manufactured by the Pelton Water Wheel Company. It will be operated under an average effective head of 857 feet—the highest in the world. The cost of the wheel with installation will be about \$100,000 and it has a capacity of 35,000 horsepower at 514 revolutions per minute. Water will be turned into the turbine for the first time early this summer.—The Open Window.

A. M. Zink who had been in Portland for another treatment, returned home Wednesday. He also took a trip to Berkeley in San Francisco. He states he is now practically rid of his disease and is happy over the fact.
