Most Satisfactory Hog

A bog which remains in good health from the day he is farrowed until he is loaded on a market-bound train is usually a satisfaction to the farmer, the packer and the consumer. But there are many diseases and parasites which beset him during the few months allotted for his economic performance. If this performance is to be a creditable one, the hog grower must keep close watch over his herd and learn to know something of the symptoms.

You never can tell. Our dearest friends are not necessarily the most expensive ones.

Laying your plans carefully now. may help you have hogs to market in summer or early fall, a time when the nog market is least crowded. Sheep are naturally of a dainty dis-

position. Feed that has become slightly solled is not eaten by them unless there is nothing else to be had. No ill effects should result from in-

breeding if the stock is sturdy. Most of the good breeders of the country use this method to develop new strains.

Sheep at the present time are among the most profitable of farm animals. The sheepman's dollar is worth considerably more today than it was in 1913. This not true in the case of certain other classes of live stock, notably hogs.

Sliage of good quality and low to acidity is an excellent feed for sheep. Experiments have been conducted which show that a good quality of sliage is quite as satisfactory as roots and that it makes a material saving in hay and grain.

Experiments, under proper feeding conditions, have demonstrated that a cow which produces 100 pounds of butterfut in twelve months will average an income of \$10 over the cost of feed. This does not pay for labor.

The Maine experiment station has shown that milk yield and butterfat percentage are definitely transmitted by both sire and dam to the first generation crosses of dairy and beef breeds. High milk production is purtially dominant to low, and low butterfat percentage to high.

BUSHY'S SURPRISE

BUSHY SQUIRREL had, all his storehouses full. He was not lary, even if he was too fond of mischief. After his work was done Bushy began to look about, peeking into the pantries of all his neighbors,

Grandpa Squirrel lived all alone, so of course he had to look out for his stores and take care of his home all himself, and such a neat and tidy place as it was quite provoked Bushy when he pecked in through the shutters and saw everything in apple-pie order.

Bushy's eyes began to twinkle, "I'll ave some fun," he said to himself. "I will turn everything in Grandpa's house topsy-turvy and I will hide all his nots and put stones in place of them."

So the bad fellow went to work. He upset everything in Grandpa's sitting reon first, and then he began on the pantry. But of course he could not carry away all the nuts in one day so be didn't begin with those in plain sight. He dug a hole under the pantry and took the nuts that were stored the deepest.

Day after day he worked, and by and by he had carried off all of Grand-

pa Squirrel's stores and put stones in place of the nuts.

He watched when Grandpa came home and found his room upset. Bushy was disappointed that Grandpa did not make a fuss about it and call out of the door: "Who has been in my house?" Instead he went to work and put everything in place, whistling all the time just as if he liked it.

"He won't whistle when he finds stones instead of nuts," said Bushy,

But just as Bushy went out of the house who should come along but Mr. Dog and Mr. Man with an axe. Mr. Dog barked and chased Bushy

until he was glad to hide in a tree far from his home, where he had to stay for a long, long time, and who at lest he did dare to run home his house was nowhere to be seen, for Mr. Man had cut it down and carried it off. And he must have taken the nuts also, for not a nut did Bushy find, though he looked all around.

He was a very forlorn-looking fellow when Grandpa Squirrel came along a little later and found Bushy sitting on the ground where his home

"What is the matter?" asked Grand pa Squirrel, and when Bushy told him, Grandpa said, "Come along home with me. I have plenty of room in my house and plenty of stores."

Poor Bushy! He felt sorry for the way he had treated Grandpa Squirrel And he was glad enough to go, for it was cold and he knew that it would be a long, cold night for a little squir without a home

When Grandpa Squirrel opened his door a nice bright fire was burning in fied and then converted into alcohol. the fireplace and everything was in apple-pie order. But it looked very different to Bushy now and he was glad to sit down in a nice big chair in Grandpa's tidy room.

Grandpa hurried about, making a nice nut soup. And as Bushy watched only the spirit thou workest in, that him he began to feel uncomfortable, can have worth or continuance.- Car-"What if Grandpa found the nuts lyte. were gone and he had only stones in his storeroom," he thought.

It wasn't nearly the fun Bushy had expected it to be when he started out that day, and if Grandpa did not have any nuts he would have to go without his supper as well as Grandpa.

Bushy Squirrel felt and looked very much ashamed, but Grandpa laughed and said, "I know just how you feel, my son. I was young once myself, and I have not forgotten that I thought it was fun to eat old Miss Squirrel's

Bushy stayed with Grandpa and he could not let Grandpa do any work, He got up early mornings, made the fire and got the breakfast, and did all he could to make up for the pranks he had played on him and to repay him for his kindness in giving him a home.

And no more pranks did he play, for Bushy learned that many times what he thought fun was really plain unkindness

The Why Superstitions

By H. IRDING KING Kirone consequences and the consequences of th

DROPPING KNIVES

THE superstition that the dropping of a tableknife means the coming of a stranger existed before forks were invented; when a man cut his food with a dagger and conveyed it to his mouth with his fingers. In those days a man carved his roast and his enemy with the same utensil. When men held their lives and their property by the sword they became much attached to their weapons; personified them; gave them names. As witness Arthur's Excalibur and Roland's Durendal, There was, also, a survival of the

primitive idea that an article closely associated by personal contact with a man came to partake of that man's personality. It can readily be seen how this idea would survive especially with regard to the sword-or to the lesser sword, the dagger-man's friend for defense and ally for aggression. This belief in sympathetic magic natsrally caused the sword or dagger to be conceived of as endeed with certain supernatural powers. So when a sword or dagger dropped from its sheath without apparent cause-unsheathed tractf as it were-it was a warning to its master of the coming of a foe-and foe and stranger were synonymous in those days.

Scott alludes to the superstition in ing Dalay the generic term for Amer-The Lady of the Lake" when Doug- lean girls. ins' sword "Did self-unscabbarded fore show the coming of a secret foe," When for domestic purposes tableknives were substituted for daggers the omen attached Itself to the substitute. When the knife dropped to the floor it still warned of the coming of a stranger; but stranger and for were no longer synonymous. In many sections the omen has been modified to include the coming of any visitor. stranger or otherwise. The belief ometimes run across that dropping a fork means the coming of a male vikltor and a knife a female visitor is a modern varient of the old superstition suggested by the shape of the oldfashioned, two-pronged fork. What's in a Name?" By MILDRED MARSHALL

DAISY

Wirn the possible exception of Rose, there is no flower name so popular as Daisy. According to all etymological laws, Daby has no right to be accepted as a proper name unless it is taken in the sense of commemorating the humble but charming little flower of the field.

However, Dalsy is still Daisy, from same curious coincidence is true of no other feminine name in the English language, and her whole etymological history makes an interesting circle within a circle. Dalsy is either the endearing diminutive for Marguerite, white men within the bounds of wha or she is the term for the little white is now Colorado, was erected in 181 flower with the heart of gold which for a troop of Spanish cavalry patro brightens summer mendows. But, as ung the Arkausas, near the site of a certain Marguerite, famed in history, was assigned the little blossom as her special flower, it, in turn, was

called a marguerite. Dalsy pleased the Anglo-Saxon car, since Marguerite is unmistakably French; and Margaret, the proper English form, carries a subtle bint of dignity and reserve. It is easy, therefore, to understand its vogue in this country, which is given to contractions and diminutives, Indeed, Henry James' much discussed novel, "Datay Miller," very nearly succeeded in mak-
