## Loose Wires Are Always Dangerous

No matter how innocent looking a wire dangling in the street may be, says the Oregon Public Utility Information Bureau, it is nevertheless a potential death hazard, and should be avoided as one would avoid poison or small-pox.

Only a short time ago, two Seattle boys were electrocuted while trying to hoist a garbage can to the top of a light pole as a Hallowe'en prank. Numerous fatal accidents have recently been recorded where boys and grown ups have attempted to string radio aerials across live wires of high voltage, or to attach them to light poles. These high tension lines carry almost certain death at all times and sometimes even a "dead" wire swinging in the wind strikes a "live" wire and becomes an instrument of death.

Therefore the best policy is to consider all loose wire as being deadly, and keep as far away from them as possible.
