A total of \$3,000 IN CASH prizes will be awarded to competitors in this GREAT WORD-BUILDING CONTEST. Send stamp for circular and rules. Address: Sheffield Laboratories, Dept. 12, Aurora, Illinois

HELP FROM THE LORD

The Lord helps those who help themselves. Let the people of Oregon be sold on their own products, not because some people are endeavoring to boost them, not because it is a good thing for the state—although that is reason enough, but because they can't buy any better products than those that are made and produced in Oregon, and that is buying goods of quality and merit they are practising thrift and economy. On these grounds Oregon should be sold. On these grounds Oregon should be developed. On these grounds we should invite people to come to Oregon and on these grounds, more than on any other, we should base an anticipation of a more thoroughly developed, a more prosperous and a more contented Oregon.—Herbert Cuthbert, Portland Chamber of Commerce.

Wheat Treating Machine Simple and Inexpensive

A machine for treating seed wheat with copper carbonate for smut control, simple and inexpensive was devised by George W. Kable, agricultural engineer of the O. A. C. extension service, can be made on the farm in a few hours. It has a capacity of two bushels and will treat 15 to 40 bushels an hour.

A bulletin telling how to make the treating machine may be had on application to the local county agent or to the extension service of the college at Corvallis.—Oregon Agricultural College.

Miss Josie Pedro, who has been visiting in and around Pendleton for some weeks returned to her home on Thursday.

CANCER IN OREGON

More persons die from cancer in state of Oregon than from tuberculosis. It is the third greatest cause of death in this state. At about forty, skin cancer may develop. It often starts as a slight scaling spot that looks like nothing in particular. The same precautions should be used and the same rules followed as for moles. If they are treated properly and promptly, cancers of the skin can be kept quite harmless in most cases.—Oregon Board of Health.

PARENTS TAKE NOTICE

Setting fire after night is contrary to the ordinances of the Town of Ione. Parents will be held responsible for infractions of the ordinance by their children and for any damage that may follow.

UNIVERSITY OF OREGON, Eugene, March 19.—With the recent dedication of the First Congregational Church three blocks from the campus, an increased interest is being shown by Eugene religious interests in student and faculty patronage of local churches.

The old Congregational Church was on the West Side of the city but the construction of the new edifice near the campus indicates the general movement of Eugene churches towards the campus.

Early Ohio and Irish Cobbler seed potatoes 4 cents per pound, cash.

BERT MASON

SCHOOL TO GIVE OPERETTA

Evelyn El Louise Mortimore will present the fifth and sixth grades of the Ione Schools in the Greek operetta "Pandora" at the School Auditorium soon.

Perhaps no other stories have ever been told so often or listened to with so much pleasure as the classic tales of ancient Greece.

The story of Pandora has ever been a pleasure to old and young alike. This story has been arranged from Hawthorne's story, "The Paradise of Children". The music is especially attractive and the effort the children are putting forth predicts a grand success in the rendition of the operetta. The solo parts are well taken by our young artists.

CHARACTERS

Pandora	Faye Murray
Hope	Barbara Erwin

601,317 Miles
—and Not One Cent for Repairs

The real value of the 1925 Star is proven by the service it gives its owners in every day use.

Here's a case in point: Twenty-four Star owners report that they drove an aggregate of 601,317 miles without one cent cost for repairs.

Sounds unusual—yet, based on the reports of 40,000 Star owners on the Pacific Coast, the average cost of replacement parts averages 63c per car. That's what Star gives you in low upkeep cost.

And it does prove the truth of our statement that no car in the low cost field equals the 1925 Star for day in and day out mechanical performance.

And with all that, you drive the best looking light car designed.

Your dealer has the late models, all with the Million Dollar Motor, with its quick and abundant power—quick acceleration (5 to 25 miles per hour in 4½ seconds)—20% power increase. See the 1925 Star!

High-Grade Mechanical Features on all 1925 Star Cars

Full Force Feed Lubrication
4-Wheel Brakes
Tubular Backbone
Disc Clutch
Hollow Cam Shaft

Cut Machinery Cost In Half

The man who leaves his machines in the fields is paying, by depreciation, for an implement shed, but not getting the shed.

You can cut your machinery cost in half by prolonging its life and usefulness. You can double the life of an implement by putting it under cover as soon as you are through using it.

The cost of an implement shed to protect \$2,000.00 worth of machinery is only a fraction of that sum.

We have many excellent implement shed plans to show you, and we have the right material to build just the kind and size building you require. Do not make the mistake of building before you examine our up-to-date implement shed plans. We will be glad to have you call and examine them, whether you are building now or later.
