Plumbing Ocean's Depths

The maximum depth at which even the most experienced diver can work is now about 200 feet. Cut Machinery Cost In Half

The man who leaves his machines in the fields is paying, by depreciation, for an implement shed, but not getting the shed.

You can cut your machinery cost in half by prolonging its life and usefulness. You can double the life of an implement by putting it under cover as soon as you are through using it.

The cost of an implement shed to protect \$2,000.00 worth of machinery is only a fraction of that sum.

We have many excellent implement shed plans to show you, and we have the right material to build just the kind and size building you require. Do not make the mistake of building before you examine our up-to-date implement shed plans. We will be glad to have you call and examine them, whether you are building now or later.
