Congress

No. 2

Statistics have proven that only one-half of one per cent of the speeches made in Congress are listened to. A great many Congressmen speak IN, but not TO, Congress. But every speech is published in the record. They send the records back home to show "What they told 'em up there in Washington." Now the people back home think Congress heard their "Lem" tell 'em this.

Now, here is my scheme to stop speech making. A Bill reading as follows: "Congressional Record must not only contain speech, but number of members, and names who listened to speech, and why." For instance: "Congressman Post Hole arose to a point of information and spoke at length on, 'Is Locarno a town, or is it a Treaty?' Length of speech, without waiting for applause, four hours, thirty-six minutes; attendance, Gout (Rep. N. Y.): 'Unable to get out.' Sixty-four (Dem. N. J.): 'Case of reciprocity, he listened to mine.' Lowbrow (Rep. Mass.): 'I was asleep, even the good speakers haven't woke me up.'"

Now I claim that will stop some speech making. The minute it gets back home that "Lem" is talking to himself up there, "Lem" will stop talking.

You know why they won't listen to anybody up there? They have gone out to smoke, that's why, and you know why they've gone out to smoke? Why, "Bull" Durham, of course. IT'S BETTER THAN ANY SPEECH EVER MADE.

Long tunnels are proving "rough on rails," since dampness and sulphur from the locomotive smoke spread over the action from water and smoke.
