AMMUNITION YOU CAN SHOOT WITH CONFIDENCE

There is plenty of action when a pheasant flushes! And he's much harder to bag than he looks to be because he is so liable to flush at long range.

You need a shell that will reach out and get him. That's why you should use Peters High Velocity—an amazingly long range, hard hitting shell loaded and tested by methods exclusively controlled by Peters.

You can shoot High Velocity with perfect confidence that it will do its part to bag your pheasant—if you do yours.

There are many other articles in our store which will contribute to the success and pleasure of your hunt—we are here to serve you.
