Fruit Flavors With Pork

Cooked Apples Are Always Pleasant Accompaniment.

(Prepared by the United States Department of Agriculture.)

Because of their pleasant tartness cooked apples are an acceptable ac companiment to any of the usual cuts of pork-roasts, chops or sausage. The apples need not always be made into sauce, however. Sometimes serve them baked, or fried, or glazed. Or have an apple dessert. Other slightly acid fruit flavors may take the place of apples for a change-fried pineapple, for instance, or cranberry sauce in the winter months, or tart jellies like currant or beach plum.

Success in preparing pork cuts, says the bureau of home economics of the United States Department of Agriculture, depends on regulating the best so as to cook the ment well done to the center of the piece and at the same time to keep the outside from becoming hard and dry. Moderate cooking temperature is best after the surface has been seared to develop rich flavor. It is neither necessary nor desirable to add water to pork roasts during cooking. Hams, shoulthe outside to baste the lean meat. and so do not dry out when roasted fat side up at moderate temperature in open pans without added water.

For a pork loin roast have the butcher crack the bones so that it can be carved in slices between the ribs Wipe the meat with a damp cloth, Sprinkle with sait and pepper and rub with floor. Lay the loin, ribs down

HINTS FOR HOUSEKEEPERS

Let the children have plenty of outdoor play in the sunshine now to help them resist colds this winter.

Weather stripping around the windows helps to save fuel and to keep the house evenly heated in winter.

To foster a love of reading in chill dren, see that they are provided with comfortable chairs and good light placed conveniently near.

An uncovered kettle and short cooking in rapidly boiling water aid in keeping the color in green vegetables during cooking.

Soap and bot water and occasional ly kerosene oil are better cleaners for porcelain or enamel than coarse abrasives, since these may scratch

To Make Brown Bread Karananan mananan mananan M

Beat two eggs, add one rounded tablespoonful of melted butter, dissolve one tenspoonful of baking sods in one and one-fourth cupfuls of buttermilk and add half a teaspoonful of salt. two cupfuls of graham flour, one cupful of cornmeal and one scant cupfu of brown sugar. Beat all well. Bake in a well buttered pan in a slow oven for one hour, Raisins and chopped puts may be added if liked.

and fat side up, on a rack in an open roasting pan. Sear the meat for 30 minutes, or until lightly browned, in hot oven (480 degrees Fahrenbeit) then reduce the temperature rapidly to a very moderate heat (200 degrees to 325 degrees Fahrenhelt), and cook until the ment is tender. A join weighing from 4 to 5 pounds will probably require from 2 to 21/2 hours when these oven temperatures are used. A roast ment thermometer can be used with loins, just as with ham and other thick roasts. Put it into the raw meat so that the bulb reaches the thickest part and leave it in during all the time the roast is in the oven. When the mercury in the mean thermometer registers 185 degrees Fahrenhelt, the meat is well done to

Evening Fairy Tale for the Children

In the music shop the lullaby had ; put them all to sleep, but they were only going to take a nap so as to rest for the ball that was going to take place.

The instruments and pieces of music had all come to life and were hav-ing a fine entertainment for their guest, Minna.

But the lullaby had certainly made them sleepy.

At the very last note everyone of them had fallen off to sleep, though some had gone to sleep a little before

Minns looked around and saw the music sheets resting on tables and

The Big Bass Viol was leaning up against a wall, taking his nap. The Yiolin was resting upon a chair. Minna put her head down on the Piano and closed her eyes. Either she went to sleep very quickly or else the others didn't sleep any length of time at all, for in what seemed but a few minutes the Metronome shouted:

"Time-to-wake-up." Once again they all dusted themselves off, and one or two sheets of music smoothed out their corners which had got bent over a little.

Then everyone began to dance. The Sharps and the Flats came out from the pages of the music and jumped here, there, and everywhere over the Plano. The Grace Notes did the loveliest of dancing steps.

their full length.

They certainly looked quite large and Minna kept stretching her hands the way she did when trying to reach octaves on the plane at home

Of course none of these little cres were big enough to dance on the floor. They danced on some of the

Minna Put Her Head Down

other planes in the shop and the Grace Notes did the same, flying down over other Notes, reminding Minna of the way butterflies alighted on the honey-suckle bushes in the garden.

The Chords came out in groups and looked distinguished and handsome. From time to time the orchestra

changed. A new group took the places of those who had been-playing,

The Octaves stretched themselves to | so that all had a chance to dance. Minna danced a lovely dance with the Violin who hummed softly and sweetly as he danced.

The First Pieces were dancing

around with some of the Scales.

Minna particularly liked the look of one C Major Scale who was like his relatives and yet appeared finer and of greater dignity and simplicity than the others. He was dancing with a charming little First Piece. The First Piece, Minna noticed, was written in the C Major key. Perhaps that was why they had so

much in common, or were in such harmony as Miss Drumble, her teach-er, would say. There were other First Pieces, to

be sure, but Minns watched this couple more than any of the others. Even as she danced with her different partners, she watched them. They were dancing together all the time.

The tunes to which they danced were many. How gay it all was! Minna was glad that she had on her good blue dress. Her every-day dress had become so shabby that she had dressed up in her better one for her

When she had started on her walk she had thought of going home to change into the old one, but then she had decided she hadn't much time, and that she wouldn't really burt it. How thankful she was now that she had not gone home to put on her old

HOT COCOA GOOD **COLD DAY DRINK**

In cold weather it is good for the younger children to have a hot drink before starting for school in the morning. Cocoa made with milk is both a food and a beverage, and most children enjoy it for breakfast. The United States Department of Agriculture recommends cocoa as a suitable addition to the bot school lunch. When it is not possible for the children to obtain it at school the mother may serve it when the children get home in the afternoon, or as part of the evening meat. Few adults will refuse an appetizing cup of cocoa for lunch or supper, when dropping in to call, or when returning late at night from a cold trin. Make cocon with whole or skim milk

if possible. Allow two level teaspoonof cocon and about two level teaspoonfuls of sugar to each half pint of milk. While bringing the milk to the scalding point mix the cocoa and sugar to a paste with a little cold milk or water. Add to the hot milk, bring to the boiling point, and boil for about a minute. To prevent scum from rising, beat briskly with an egg heater. Some persons like the addi-tion of a few drops of vanilla. Whipped cream or a marshmallow may be floated on top of each cup.

What Home Ownership Means to Average Man

Look into the family life of the home owner—there you find right thinking, thrift and pride. Father, mother and the children weeding the lawn, planting flowers and trees. Would they take that same interest working in a yard where contentment is measured by dollars and cents, paid to the landlord each month?

Spare time is spent making imrovements, placing a touch here there to enhance the beauty and in-crease the value of the home place. Drive over the city and you can

easily distinguish the home that is owned by the family within from the house which is rented. The home owner gives his children a better chance. Good citizens grow out of well-established homes. They are better known and they command respect in their community.

If for any reason one has outgrown one's present place, remember there is some one ready to take it over—some one who will be proud to call it home. He should by all means buy another. One can never be satisfied unless one does. After once owning your own home it is evident that life seems aimless and shallow, paying for the privilege of living in some one's property other than your own.

The American home means so much today. It is the very corner stone of progress and safety. Its morale and dignity must be upheld. The home owner commands respect.—Indianap-

Roof Important Unit

in Decorative Scheme The modern note in home decorais complete harmony of color, outside

as well as inside the building.
According to this idea, while the
roof of a house must give protection against the elements and must be lasting, yet as a prominent architectural feature of the house, the roof should also add to the beauty of the structure.

In line with this idea, commercial roofing materials are being manufactured in the greatest selection of colors. With these new colors it is pos-sible to make the roof one of the most effective units in the decorative

These beautiful colors can be combined in an almost endless variety of tasteful combinations to harmonize with every architectural style and col-

By consulting a roofing color chart, information is obtained in a second as to what color roof is in harmony with a red brick house, a white Colonial residence, or a gray, brown or cream building. The chart also takes into consideration the color of the trim so that building, roof and trim may form a harmonious whole,

Protection From Fire

The modern home builder forsees and cancels a possible "4-11" alarm when he plans his house. He knows, for example, that a con-

siderable proportion of house fires originate in basements—around beating plants or in stores of fuel, ash, trash or other inflammable material, So he plans to prevent such figures Fire may also enter through the

roof which is exposed to flying em-bers. Fire-safe shingles or tile eliminnte the bazard and add materially to the beauty of the home. Real fire safety also implies fire

resistive construction in exterior walls. Fire stops in walls, anburnable stairways, proper design of fireplaces and chimneys—these are a few of the details the modern builder includes in his far-sighted "4-11" alarm

Be Liberal With Paint Paint is insurance against le

sulting from weathering and decay. Paint protects a house and keeps it in good condition. Weathering and decay cause losses, according to one authority, of over a billion and a half dollars a year. While most of us are willing to pay for fire insurance be-cause of the sense of security it brings, few of us realize that weather insurance is really more necessary be-cause while fire rarely threatens, wenthering and decay are constantly at work to lower houses into dust. It has been estimated that if a house is painted every five years, its value tocreases about 5 per cent at such

Longer Covenants Urged In many suburban sections there has come a change in the duration of restrictions placed on property. It was formerly thought that 20 years was long enough, but developers are now of the belief that 33 years in better. The reasoning behind the new figure is that a man who buys a house at the beginning of his business career, and often at about the time he takes on the responsibilities of marringe, will be approaching the close of active participation in business at the end of 33 years.

the walstline, it is necessary, if one keeps fit, active and ready for the enjoyment of all of the good things that nature provides us, to cut down on starchy foods, ent less of meat and more of the natural fruit

julces, which are invaluable in neutralizing the acid ash of heavy foods. Acidosis, rheumatism of various forms. get us if we don't watch out.

When bearthurn (an acid stomach) rolls up to choke you, take a good glass of fresh orange juice and see how quickly the discomfort will subaide

Drink orange juice daily as much and as often as the stomach demands it. With a system well nourished daily with citrus fruit juice, whether iemon, lime, grapefruit or orange, the dreaded arthritis is routed and the body is kept in perfect condition-

provided the food supply is reasonable. Young people who work off so much steam in exercise may eat more freely of bearty foods, but inactivity and overeating is the cause of a large proportion of disease and death.

Nowadays the wise mother begins with the citrus fruits. She gives her three-month-old babe a teaspoonful ings. The vitamines and mineral matter found in orange juice builds up the tissues and bones and gives the body resistance to colds .nd infection. The small glass of orange juice is

part of every well-appointed table for the first meal of the day. Fresh vegetables, especially the green-leaf vegetables, like lettuce.

chard, spinneh and brocolii, should be part of the menu of every dinner. Uncooked onions if eaten at night are

· Furred Cloth Suit Smart for Winter

By JULIA SOTTOMLEY *************************

The thing that intrigues about the furred cloth jacket suits, which are the smart note for nearly winter, is that they dare to be so strikingly original. In the yesteryears, a sult was mere

ly a suit lacking for the most part that "variety" which "is the spice of life." How different the modern suit! It has become a creature of imagination in the evolving of which genius is apparently taking its fling. It is just such fascinating types as

the one in this picture which is causing the fashionable world to pay homage to the fur-trimmed suit as a "thing of beauty" as well as costume of exceeding chic.

This striking model is made of brown verons cloth, its collar of brown caracul interpreting an entirely new and decidedly flattering silhouette The bordering on the coat repeats the graceful circular movement of the collar. There is the buckle fastening. It is the latest-much more satisfactory and smarter than the button-and-loop The close-fitting brown felt turban with its one-side flare, crowns this costume with a definite style touch.

The vogue for thin flat furs is proving an inspiration to designers to design, for the reasons that supple peltry, such as beaver, seal, lapin, broadtail, Persian lamb, astrakhan, galyak, caracul and such, yield to mapipulation as gracefully as any fabric.

The smartest of the smart on the daytime costume list is the suit of tweed for sports, and broadcloth or velvet for dressler wear, which is collared and cuffed with some one of the furs just mentioned. Competing with the flat fur trims, to no small degree are the showy long-haired varieties, chief among which are badger fox, wolf and lynx.

Not all suits are black, not all suits are brown, although many of them are, but there is also a most delectable color program mapped out for the furred cloth suit, which includes deep wines,

eggplant shades.

A fascinating type of suit or ensemble, if you so please to call it, which has made its debut this season, exploits color and novelty in its every detail. We refer to the suits of loose-woven tweed which have an interwoven border which introduces a multiplicity of typical gay autumn

neatly finished with a selvedge which is featured in a trimming way. Of a cunning hat, usually a draped toque which displays the selvedge to advantage. In some instances a pocy etbook and a boutonniere of the self tweed adds the final touch of chic and

Mulligatawny Soup Is Tasty

(Prepared by the United States Department apple in the botter until lightly of Agriculture.) browned. Add the meat stock, the The distinctive flavor in mulligataw-

ny soup that makes it different from most other soups is the suggestion of curry, borrowed from East Indian cookery. The vegetables and seasonfngs are also a source of its fine ap perizing taste, and as some of the ment is added at serving time, the soup is substantial and nourishing. The addition of a tart sliced apple is another touch that makes this soup unusual. The bureau of home eco nomics of the United States Department of Agriculture supplies these directions for making it:

USED FOR STOCK

I or 4 pounds vent 1 onion, halved knuckle I stalks celery I quarts cold water Blade of mace tap, peppercorns

1 green pepper,

cup sliced onion cup carrot cut in small cubes cup finely cut celery 4 cup butter 1 cup creamed t mate % tap curry pow-der g cloves

finely cut tart apple.

1 sprig parsiey 2 tsp. salt, or to taste. Wipe the knuckle of vent, put into a kercle with the water, peppercorns, onlon, celery, and mace, and simmer

for two hours. Remove the seum and

strain the soup stock. Cook the onion.

carrota, celery, green pepper, and

sensoning, and the tomato. Simmer for one hour, or until the vegetables are tender. If desired, the vegetables may be strained out, rubbed through a sleve, and returned to the soup mixture. Whatever way the vegetables are desired, add one cup or more of the meat finely chopped to the soup. Serve the soup piping hot with crou-

TO MAKE CINNAMON ROLLS

Sprinkle a layer of biscult dough thickly with sugar, cinnamon and bits of butter. Roll as for Jelly roll, cut into one-inch pieces, and set them cut side down in a pan prepared as fol lows: Butter a pan, sprinkle thickly with sugar, bits of butter and some cinnamon. Pour in sirup to cover the lower part of the pan with a layer of strup. Set the rolls in this and bake as directed. When baked, turn the rolls out on a rack. If you want a roll that is covered with a plentiful supply of sirup, increase the amount of sirup that is poured into the pan If a glazed surface is desired, additional sirup or honey may be poured over the tops of the rolls before they are to be baked.

rich greens and very new dahlia and
