FOR JOINT REPRESENTATIVE

I have decided to file and contest for reelection as representative in the Legislature from Umatilla and Morrow counties. If the voters of this district approve of my record in office, I will consider it an honor to represent them in the legislature again. With the experience gained in two sessions of the legislature, I believe I can do some good work for this district and for the State of Oregon.

I have not attempted to make a record in the way of the introduction of bills but in consideration of the hundreds of measures introduced at each session, I have done my best to promote good legislation and to help defeat that which seemed to me to be injurious to the interests of the people of the state.

I was one of the sponsors of the individual income tax bill which will be on the ballot at the coming November election and I worked on the committee which put in its final form the Constitutional Amendment which will give the people of Oregon the opportunity at the next general election to adopt the call for a new form of government.

If I am again honored by election to the legislature, I will endeavor before what I call working for the best interests of this district and the State of Oregon.

For the Cost of a pencil

You can enjoy the quick heat and snug comfort of an electric heater for more than hours for the cost of a pencil.

You can enjoy the warming bath by the radiant rays of an electric heater for a year mornings for the cost of a pencil.

You can quickly take the chill from rooms in the spring and fall when it is not cold enough for a furnace fire—for the cost of a few pencils.

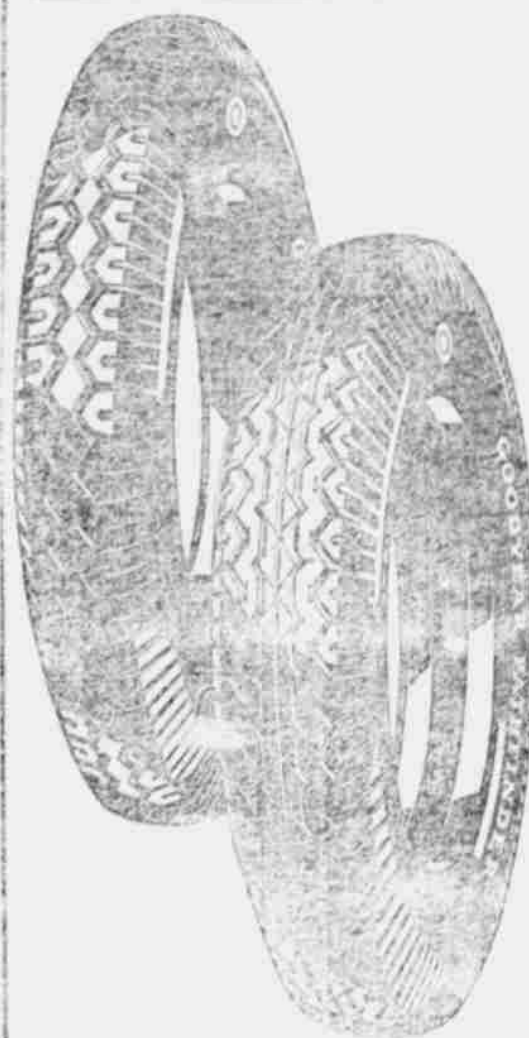

These and many other conveniences are available at a cost for current that is lower than ever before.

While the cost of other items in the family budget have increased, the cost of electricity has gone steadily downward.

THE THINKER LEADS MODERN PROGRESS

By JOHN G. LONSDALE
President American Bankers Association

The greatest need of the world today is interpreters of our times—modern disciples in agriculture, finance, politics, industry.

Who can see through the fog and have that unshaken confidence that can solve our difficult problems and advise, instruct, and influence those who are either indifferent or misled in their perceptions.

Through the thinker and the interpreter, unimpaired conditions are disclosed or possible. The American people are so constituted that they can meet and conquer any situation once it is known and understood. It is the wisdom that comes like the thief in the night.
