SAVINGS PASSBOOKS

SOUGHT BY CROOKS

Use Them to Steal Money by Forged Slips — Should Be Guarded as Carefully as Cash.

Continual vigilance in safeguarding savings pass books, as well as blank and cancelled checks, against theft by crooks, who use this material in forgery operations, is urged on bank customers by James E. Baum, Deputy Manager of the American Bankers Association, in charge of its Protective Department. This department is continually vigilant in promoting means, both among bankers and the general public, to thwart the operation of bank crooks. It annually investigates hundreds of crimes against banks and is responsible for the majority of arrests among this class of criminals.

"In a large majority of cases of forgeries on checks or savings withdrawal orders investigated by the American Bankers Association, stolen blank checks or savings pass books were the forgers' chief stock in trade," Mr. Baum says. "In many instances the temptation presented through the careless handling by depositors of cancelled or blank checks or pass books so that they fell into the hands of others was the immediate stimulus for hitherto honest people to commit their first criminal offense."

Banks should educate their depositors to exert the same degree of care in handling these instruments and to avoid leaving them about unguarded as they exercise in respect to actual money because they represent money, he declares.

For dealing with the bank robbery situation, Mr. Baum recommends the use of electrical alarms actuated by any tampering with the wires or mechanism and also wider adoption of the plan of state police forces now employed in a few states, declaring that last year in seven eastern states where state police forces were maintained there were only 20 bank holdups as against 164 similar attacks perpetrated against banks in five states in the central and far west, where banks are denied the advantages of the speedy and coordinated action given by state-wide police forces.

"The records of the American Bankers Association Protective Department reveal that for many years the odds in favor of state police protection have been at least 8 to 1 when measured by the experience of banks in states where efficient police protection is missing in the rural districts," he says.
