Person Mention

Continued From Page 1

On Wednesday of last week O. E. Engelman departed for Portland where he has office work in the advertising department of R. K. O. distributors.

SAY WILL ROGERS

BEVERLY HILLS.—Well all I know is just what I read in the papers, and what I get through the mail. Arthur

Brisbane and I have been having a good natured kidding through the papers about Russia. Arthur kinder believes that Russia should be recognized, and me I don't know whether they should or not.

Lors, that's a Diplomat's business not mine. I am not getting Diplomatic wages. I am only getting acting wages.

But that's got nothing to do with it, what I am getting at is the interesting letters this fellow Brisbane writes. I am going to show you one he wrote me that I just got.

My Dear Rogers:

Now that I have established your credit as a multi-millionaire, and that you have destroyed mine by making me out in the public prints as desti-

Lexington News

Miss AMABELLE STRODTMAN

The fifth annual Pioneer Reunion was held Saturday in the Leach Memorial Hall. The attendance far exceeded that of previous years. A number of pioneers were seated at the '70' table; grandma McMillan who had reached the age of 88 being the oldest, being the oldest. A large angel food cake, baked by Mrs. Fred decorated this table and at the bountiful dinner, each of these pioneers received a piece of it. Four other tables were set for the rest of the attendants.

A short program was given after the dinner at which Frank Turner, Ed and Harvey Miller entertained with a few old time numbers.

8,000 FARMERS PROFIT

FROM PACIFIC POWER & LIGHT SERVICE

E. N. Benson Poultry Farm near Hood River

THE policy of this company in extending its lines to serve a large rural area in the states of Washington and Oregon is benefiting 8,000 rural customers who use electricity to bring convenience and greater leisure into the farm home, as well as to perform farm work that otherwise would require extra labor. Our customers use electricity to cut farm production costs and increase profits.

Our electricity is used profitably on all classes of farms—irrigated farms, dairy farms, fruit farms, poultry farms and diversified farms, throughout this large and rapidly developing territory; territory that enjoys a national reputation as one of the most progressive and prosperous farming sections in the entire United States.

Pacific Power and Light Company's far-flung system of power plants, intricate transmission networks, and the unselfish devotion of a trained personnel insure availability of electric service practically everywhere in the territory throughout the full twenty-four hours of every day in the year.

Electric lights are used in chicken houses on the E. E. Benson Poultry Farm to make hens work a longer day and increase production. Mr. Benson also uses Pacific Power and Light Company service to operate three large incubators and to light his residence. This service has cost him only an average of \$6.59 a month for the past year.

REJECT POWER BILL

THIS is no time for dangerous experiments in public ownership that invariably increase taxes and burden indebtedness against real property," say scores of level-headed farmers and other citizens who have studied the proposals for putting politics into the power business. This measure would take the lid completely off tax limitations. It constitutes the most dangerous tax-increasing scheme ever submitted to the voters. Vote it down for your own protection.
