THIS HUMAN BUSINESS

Probably the popularity of the telephone—domestic as well as transatlantic—is due to the touch of personality as much as to speed. We work best man to man, when we can feel personality and measure human reactions—Magazine of Business.

DWIGHT MISENER TAKES TO THE AIR

Mrs. Dwight Misner has received information of the safe arrival of Mr. Misner in Flint, Michigan, where he was called by the serious illness of his sister. He found the sister slightly improved.

Mr. Misner was forced to abandon airplane travel at Laramie, Wyoming, and complete his journey by plane. This was necessary because of the dense fog over the rocky mountain region. Traveling from Pasco to Laramie by airplane, however, shortened the time of Mr. Misner's journey by twenty-four hours.

Kentucky's Famous

As we were getting ready to pull out of Lexington the other day, a traffic cop, who was grinning from ear to ear, stopped to tell us what it was all about. He said a car bearing a Michigan license pulled up to the curb and the woman driver hailed him. She wanted to know about all the historic and interesting spots around the Blue Grass city. He told her where they were and how to reach them, and then she said:

"Now where is the old home of Nancy Hanks? She was a very famous woman down in these parts, wasn't she?"

"No, madam," replied the cop, "she was a trotting horse."—(Cincinnati Enquirer.)

Figure It Yourself

Were all the membranous-capsules and all the memory-branial-biographies that make multi-individualisms, or Maya, of a once Holophilic Universe (any awareness of which is a Felt-ness) dissolved and erased, the Universe would again be a place of Holophilic-Sentient-Intercourse and a period of Holophilic-Opinionial-Estimation, or a Sum-Omit-Awareness in terms of a Common-Barometric-Felt-ness, that it was before such experiment of sectional partitionment was aspiratively introduced by one of its basic functions—"The Herodion Me," by Henry Davidge Thayer.

TRANSFORMING TEDIOUS TASKS Into Self-done Services

Quickly the kitchen is transformed into a light clean-aided room by the use of Electric Cookery, -- basements become added livable rooms by Electric Hot-Water heaters and furnace tenders --- Into every room in the home, electric, white magic flows to make it more cozily comfortable.

Transformation of the home is but one of Electricity's accomplishments. In industry it has made factories more efficient, increased production and decreased costs. It has banished drudgery by dividing working hours nearly half while multiplying productive effort and leisure.
