He suddenly changed his mind about his American possessions, and nearly sent Mr. Monroe and Mr. Livingston into a state of collapse by offering to sell them not only New Orleans, but also the whole province of Louisiana.

There was no time to write to Presithis was before the days of the cable; so Monroe and Livingston took the matter into their own hands, and signed the contract which transferred the Louisiana territory to the United States for the consideration of \$15,-000,000. LUXURIES FOR SERVANTS.

Private Baths and Suites in Some of

the Newest Houses. The new palaces built in this city every year do not supply luxuries for their owners alone. The employes are also looked after and provision is made known anywhere else.

In one of the new houses on an uptown street near the avenue the man servants quarters consist of three small rooms on the top floor. Adjoining them is a small tiled room with a shower and plunge bath and sprays. In the same room are three basins in order that the men may all wash simultaneously if they want to:

Downstairs adjoining the entrance hall is another sleeping-room for a man servant, and it has as much light and air as any in the house, in addition to having a private bath.

The rooms for the woman servents are on the third floor, and accommodate six. They are so arranged that two sleep in each room and have the use of a bathroom. In addition to these apartments there are two rooms and a bath to be used by any servant who happens to be ill. These two rooms are so situated that a servant in them may be quarantined so completely as if out of the house.

Adjoining the nursery and separated from it only by a dressing-room is the apartment of the head nurse, which is, of course, supplied with its private bath. Near the room of the mistress of the house is the room of her maid, and it has the same conveniences as the others.

Thus are the servants of the wealthy housed. When it is taken into consideration that these rooms are kept in order and supplied with everything needful by the housekeeper, the lot of the household servant in the United States seems more desirable than ever.

Most houses in which a large staff of servants are employed have also a sittingroom for their diversion. Of course, not all of the new houses built now have such an equipment as this one. It is intended for a young couple married only a year ago. The bride's mother gave it as her wedding present, and it will cost \$600,000 when completed.-New York Sun.

Use and Endorse Pe-ru-na

Dr. Llewellyn Jordan, medical examiner of the U.S. treasury department, graduate of Columbia college, and who served three years at West Point, has the following to say of Peruna:

"Allow me to express my gratitude to you for the benefit derived from your wonderful remedy. One short month has brought forth a vast change for their comfort to a degree never and I now consider myself a well man after months of suffering. Fellow sufferers, Peruna will cure you."

A constantly increasing number of physicians prescribe Peruna in their practice. It has proven its merits so thoroughly that even the doctors have overcome their prejudice against socalled patent medicines and recommend it to their patients.

Peruna occupies a unique position in medical science. It is the only internal systemic catarrh remedy known to the medical profession today. Catarrh, as every one will admit, is the cause of one-half the disease which afflicts mankind. Catarrh and catarrhal diseases afflict one-half of the people of the United States.

Robert R. Roberts, M.D., Washington, D. C., writes:
"Through my own experience as well as that of many of my friends and acquaintances who have been cured or relieved of catarrh by the use of Hartman's Peruna, I can confidently recommend it to those suffering from such disorders, and have no hesitation in prescribing it to my patients."-Robert R. Roberts.

Every Catarrh sufferer dreads the coming of winter, for with the first breath of the "ice-king" this miserable disease is fanned into life and all the disgusting symptoms return. The nostrils are stopped up and the throat can be kept clear of mucous secretions only by continual hawking
