T. W. Morgan, a prominent farmer of the Gooseberry country, was in town Tuesday. He says threshing in his section is about finished up and that the yield was considerably better than was expected before threshing commenced, nearly every farmer having to go and get more sacks after the machines started.

Mrs. L. E. Cohn, the leading milliner, will have a very pretty display of hats Saturday, September 9. Misses Belle Collier and Rita Morrison, who have spent ten weeks in Portland in the wholesale millinery department, will be in charge of work room, and the ladies of Heppner and vicinity will have orders left here filled promptly. Burchell, who was in the city Saturday from his ranch north of Lexington, informed us that he had finished up his threshing and that his crop of 300 acres of wheat averaged from 18 to 20 bushels per acre. Eighty acres made thirty bushels to the acre. His yield proved five bushels per acre more than he expected before a harvest commenced.

Mr. Herren reports that there is an immense amount of development work being done in the various mines of the district. Frank E. McKnight was in the city Saturday from Booter Creek. He had just returned from a three week's trip to the Sumpter country, where he has his sheep on range only about 35 head that there were poisoned by a miner recently. He says he knows who did the poisoning, but that it would be next to impossible to secure his conviction. Mr. McKnight says range is fine and his sheep are doing splendidly.

BILIOUSNESS AND CONSTIPATION CURED BY THEDFORD'S BLACK-DRAUGHT

Because the liver is neglected people suffer with constipation, biliousness, headaches and fevers. Colds attack the lungs and contagious diseases take hold of the system. It is safe to say that if the liver were always kept in proper working order, illness would be almost unknown.

The healthful action on the liver cures biliousness. It has an invigorating effect on the kidneys. Because the liver and kidneys do not work regularly, the poisonous acids along with the waste from the bowels get back into the blood and virulent contagion results.

Timely treatment with Theford's Black-Draught removes the dangers which lurk in constipation, liver and kidney troubles, and will positively forestall the inroads of Bright's disease, for which disease in advanced stages there is no cure. Ask your dealer for a 25c. package of Theford's Black-Draught.

LITTLE STEEL BANKS

PROVE INCENTIVES TO HOARDING CASH FOR A RAINY DAY
OVER \$100,000,000 IN CHICAGO SAVINGS BANKS

Huge Deposits in Chicago Institutions Are Made by Wage-Earners--Year's Jump, \$22,000,000.

Saving deposits now in Chicago banks.....	\$100,000,000
Amount one year ago	78,000,000
Amount ten years ago	15,000,000
Amount in 1890.....	12,350,000

Savings deposits in Chicago banks have passed the \$100,000,000 mark. In the past year they have increased upward of \$22,000,000, or more than 26 per cent. And what is best of all, according to one of the bankers interested, Chicago is just beginning to learn to save.

The state banks and savings institutions have been going out after the people in the past few years as they never did before, to show them how easy it is to save money and how valuable it is to have a good balance in the bank.

The introduction of the little STEEL BANKS has started thousands of people to saving money that was wasted before. They have imbued many a boy and girl wage-earner, as well as older folks, that it is a good idea to put aside something for a rainy day. And, as far as I have observed, the accounts that are started in that way grow and are never withdrawn except in cases of absolute necessity.

The most remarkable gain was that of the Illinois Trust, which showed a savings increase of nearly \$8,000,000. But this bank has upwards of 100,000 savings depositors—enough to make a larger town than any in the state outside of Chicago.
