 W. C. Lacy of Blackhorse, presented The Times, Saturday, with a box of choice plums of the Columbia and Golden drop varieties. They were fine ones, grown without irrigation, and prove beyond doubt that with proper cultivation fruits can be successfully raised here without the trouble of watering them. The plums were equal in every respect to those grown in the famous Hood River valley.
 E. F. Browning of Blackhorse, left with The Times Saturday a box of Bartlett pears and a sample of three varieties of apples that were very fine. They were not only large and well flavored, but were a nice smooth, well formed fruit, and were grown without irrigation. This serves as another illustration of the fact that Morrow county cannot be beaten for fine fruits, and that they can be successfully grown without irrigation.
 F. E. McKnight a prominent stockman who was in town Saturday from Butter creek, thinks the stock market is going to improve right along, especially the sheep market. The latter, he says, has been quite lively for some weeks, and he predicts a further advance. Mr. McKnight does not look for an advance in cattle prices before spring, as by that time the packing houses will have used up the surplus accumulated as a consequence of the late strike.

 A band of 300 head of cattle were driven through Heppner Monday morning enroute from Gilliam county to Butter creek, where they will be fed or the spring market. They were bought by Harry Rogers, who will feed them at his alfalfa ranch near Echo.
 G. W. Chapin, a stockman of Hardman, was in the city on business Monday. Mr. Chapin reports that quite a large number of cattle are being bought in his section. Most all are feeders and are being driven to Butter creek. The prevailing price being paid is \$2.50 per hundred for steers.

 W. T. Campbell, who was in town Tuesday to secure hose for the better protection of his threshing machine from fire, reports that he came near losing his machine, and Wm. Hendrix a lot of grain Tuesday morning by fire. Only for the timely work of the crew all would have been burned. It appears that the separator caught fire from spontaneous combustion and that the prompt work of the crew succeeded in extinguishing the fire before any great damage was done. The separator was scorched some, but work was resumed in a few hours after. Mr. Campbell is loud in his praise of the heroic work of his crew, some of whom were slightly burned. The machine was at the Wm. Hendrix place at the time of the fire.
