WRITING MACHINE CABINET and OFFICE DESK

and segment in troot of the operator. The motions a com-lete by the perfectly flat, is bains covered, and forms a com-plete writing desk when the machine is not in use. The table on which the machine rests is so evenly lad-anced by our patent adjustments that it needs but a sight rouch to bring the machine in position. Second.—The advantages of the swinging table are: The table is so balanced near its center on pat-ent maleable iron arms, that when the machine brought in place for use, it does not depend on types or hangers at rear of platform for support, but it held rigidly in place by sits own weight, making it impossi-ble for the machine to be tumbed down an incline in back of desk by the breaking of a rear support. The machine rests on patent slides which keeps the machine in place, and can be drawn out beyond the desk, well under the operator's hind.

more the operator's hund.

Third.—The construction of the lid closing machine space makes it air tight, and the table having felt around its boarders theroughly protects the machine from dust.

Fourth.—The foot rest and the construction of the bold as ridged as the table adjustments makes the desk as ridged as though the top was one solid board, which is a matter of great importance where a solid type-writing table is required. No operator can do good work on a study
