ANDREW ROOD, JR.,

of Catching Hand in Hay Chopper.

BURIAL MADE TODAY

Funeral Services Held by Elks Lodge This Afternoon; Deceased Was Native of Morrow County.

The announcement of the sudden passing of Andrew Rood, Jr., on Tuesday evening, came as a shock to this community. Mr. Rood, while at work with a feed chopper on his farm late Tuesday afternoon, had the misfortune to get his left hand into the machine and that member was badly lacerated as a result. The thumb and third and little finger were taken off third and little finger were taken off while the other fingers were torn and tion at Hotel Moro Thursday fore-

cfferings were many and beautiful.

Andrew Rood, Jr., was a native of Morrow county, born at the old farm home in Rood canyon. He grew to manhood here and his home has always been in this community. At the time of his death he was aged 41 years, 9 months and 2 days. For many years he has been extensively engaged in wheatraising on the Rood lands on Heppner flat, owning a large accessing and was considered the large-accessing and was considered the large-accessing the resulting content of the growers in mapping out their program. The gathering itself will be near the head of wheat production investigations for eastern Oregon—the Sherman county est operator in this part of the

To allay the apparent alarm on the

exposed, Dr. Johnston, city health officer, made some tests the first of the week in the primary grades and it was fuond that three of the little Several chan folks may have been exposed, and these will be isolated awaiting results. A lot of whooping cough, some measles, and the few cases of scarlet-ina seem to be the extent of the contagious diseases that have struck Reppner so far, and the whooping cough has well run its course, per mitting many of the children to return to school again.

Export Commission League To Meet at Moro

County Agent Morse states that one of the important meetings to be held at Moro next week, when the wheat growers conference gathers there, will be that of the officers of the Oregon Export Commission league which will be at 7 p. m. on the evening of the 12th. All Columbia basin wheatgrowers are invited to be present.

Legislation now pending before congress relating to marketing of export surplus crops will be considered, and a financial statement of expenditures of the Export Commissio league will be made. The officers feel that it is very important that Oregon wheat farmers re-affirm their stand in connection with the marketing of export surplus crops, and for this reason a large attendance at the meeting follows: is very much desired.

NOTICE OF FINAL SETTLEMENT. Notice is hereby given that the undersigned administrator of the estate of Mathew Mollahan, deceased, has filed his final account in the County Court of the State of Oregon for Morrow County, and said court has fixed Monday, the 8th day of March, 1926, at the hour of 10 o'clock in the forenoon of said day as the time and the County Court room in the Court House at Heppner, Oregon, as the place for hearing objections thereto, if any there be, and all persons hav-ing objections to said final account are hereby required to file the same in said court on or before the time fixed for the hearing thereof.

> PATRICK MOLLAHAN, Administrator.

'PIED PIPERESS' HERE WITH PIPE TO ENTICE RATS

Miss Caldwell Tells of Work Undertaken and Organizes Local Program.

Our readers perhaps took notice of the profusely illustrated article in last Sunday's Oregonian pertaining to the work of two young women, styled as "Modern Pied Piperesses," who are now visiting this state in the role of exterminators of rats and mice in the cities and towns of Oregon. These young women are Miss Helen A. Caldwell of Kentucky and Miss Anna May Wright of Virginia.

They tackled the lish with visco less bolsheviks, or at lesst socialists,

They tackled the job with vigor at Hood River, and are now visiting the other mid-Columbia towns, de-termined that the rodents shall go. Miss Caldwell was in Heppner Mon-day and Tuesday and helped to organize the work here, while Miss Wright went to Bend.

Misses Caldwell and Wright began their careers as rat exterminators about four and a half years ago in Norfolk, Va., where they were em-ployed by the health department. During the period of extermination work they learned how to mix and apply the barium carbonate of the federal government effectively. It was there that the idea of traveling over the entire land in a kind of Pied Piper jaunt seized upon them. Receiving profit, they might find out what the british do with their surplus rubber farm the endorsement of public health ser-vice organizations they started their tour. To date the two girls have worked in 34 states and the Hawaiian slands. They have met with success

wherever they have worked.

The poison formula used is: To one easpoonful of barium carbonate, mix hree or four teaspoonsful of any or dinary food a rat will eat, such as neat, cheese, cereals, fruits or vegctables. For positive results mix three kinds of food, bait separately and continue for several nights with whichever the rats seem to prefer.

In using poison where fowls or donestic animals may have access to it place the poisoned bait in a small box, cover with a larger box with holes in either side to permit the rodents to enter. Place these boxes in the rat runs at night.

Their work has the endorsement of the U. S. Bureau of Health, as well as the local and state health author-ities, and it is under this endorse-ment that they do their work. Spanking concessions this mark

Speaking concerning this work, Miss Caldwell stated to this paper that estimates of the federal health service places the rat population of a community at twice that of the human beings, in the real rat infested sections along the rivers. In the in-terior points like Heppner, this es-timate will not likely hold as the rats are scarcer here, though it would appear that there are plenty of mice and other rodents that should be kill-

Ask England. Good Pay, Good Workers. Stop, Look, Listen.

Congress is puzzled by surplus farm products production. Some reck-less bolsheviks, or at lesat socialists, suggest that the Government might interest itself in helping farmers mar-

their surplus abroad.

Charles Williams, who ought to know something about conservatism, says: "No; that problem should be left to farmers without government help." A two-month-old baby might help." A two-month-old baby mign-be left to put on his own undershirt "without mommer's help." The farwith foreign governments, under our Constitution, or with foreign prob-lems, as a baby would be to deal with its own nourishment and clothing.

products. There is a rubber farm surplus. And you notice that they manage to sell it to the United States at about a dollar a pound, when it could be sold profitably at thirty cents a pound. A government that wants to do a thing can do it.

The railroad trainmen, hundreds of housands of faithful workers, ask for better pay, and ought to get it. Railroads, protected by government, enjoy prosperity. Steadily increasing, they should divide prosperity with the men that do the work through the nights in cold and rain, when those

that collect dividends are asleep.
All Americans, especially business men and money makers, should de-mand that good workmen get their fair share of national prosperity.

The rich man can get only his share

of what the average man has to spend. Government figures show that from 1920 to 1924, "automobiles killed 60,-876 men, women and children."

And in 1924 the "death toll" numbered 15,528. Calculated to give the false and damaging impression that the automobile in itself is a dangerous, deadly demon, these figures are NOT true to

Of the sixty-odd thousand killed in five years some were the victims of stupid, reckless or drunken driv-ers, some of incompetents.

The greater number killed were victims of their own carelessness, commonly described as "jay-walking."

When a man on the railroad truck is killed, nobody blames the locomotive or auggests suppressing railroads. The signs read, "Stop, look and listen," and "Keep off the track."

The Colorado River, put to work and used, will add hundreds of lions yearly to the wealth of the United Statse. It will supply several Western

states with more than a million horse power, and irrigation sufficient to provide food for tens of millions of hu The real wealth and future happi-
