Water users of the West Extension of the Umatilla Project were thrown into a state of panic Monday by a dispatch from the Secretary of the Interior to the project manager, Mr. Scholling, ordering him to refuse water to all settlers who were delinquent in their payments of the 1923 assessment for construction and maintenance. This will affect nearly fifty per cent of the settlers and if insisted on means their ruin as land here without water is valueless and even a slight delay in obtaining water will cause a heavy loss. Directors of the district have wired Secretary Work to that effect and hope to have the order rescinded. The election to decide whether the ranchers shall take over the management of the project or not will be held April 10. It seems as though this must be done in order to gain relief from the excessive water charges of the past.
