Do You Know Anything About Printing?

E HOPE YOU DO. BUT WE FEAR THAT many do not. For the information of buyers of printing we want to say that the production of printing is classed as a manufacturing industry.

QUALITY in printing depends upon material and workmanship.

PRICE depends largely on cost of operation. Though, as anyone knows, who is acquainted at all with manufacturing procedure, increased volume decreases overhead and lowers the price proportionately.

SERVICE depends on proximity of plant—the closer the plant the more quickly a job is available, and the more available is a personal connection in its production—plus divers other matters which have to do with the integrity and reliability of the printing establishment.

THE HEPPNER GAZETTE TIMES has more than \$10,000 invested in modern, up-to-minute printing equipment, including all necessary machinery for the production of best quality commercial printing. This equipment is in the hands of competent craftsmen.

We are operating on a low overhead expense, because we are able to operate at maximum of efficency by the use of the most up-to-date machinery and because we do not have to pay the high rental the city shops must pay. Because of this fact we are able to beat city prices for almost every class of printing, with as good, and oftimes, superior product.

We are here in Heppner 365 days out of the year to receive comebacks. But we guarantee satisfaction. Every order is given careful personal attention and we "put ourselves out" nearly every day to fill rush orders.

There Are Many Reasons Why You Should Give Us First Consideration

Why the Hurry, Men?
