The long eared bunnies are becoming quite numerous again and last week Roy Fugate, who has charge of rodent control in this district for the government, was here and the farmers gathered at the Arthur Humphreys home and chopped hay which was "doctored" with strychnine and saccharine and as a result black-tailed rabbits are scattered about by the dozens and a stench like unto nothing else is beginning to rise and conveys to the nostrils evidence of the effective results of the medicine administered. A. T. Herim and Mr. Fugate spread one sack of bait one evening and next morning counted 150 dead rabbits.

The schoolhouse has been through a process of renovation and shines like new; desks have been varnished, radiators repainted, blackboards painted, floors oiled and necessary repairs made. After Mr. Macomber, the genial janitor in charge, had things all slicked up for the summer, some of the young ideas journeyed to the schoolhouse one evening and took great pleasure in throwing rocks thru the window panes, demolishing nine before their desire for destruction was sated. Possibly a slipper or shingle properly applied would correct such perverted desires.

The nature of a farewell party for her, Ladies Aid at her home next Wednesday. Since Mrs. E. K. Mulkey leaves shortly it is planned to make this in meeting will be shortened as much as hence the business and missionary meeting will be shortened as much as possible.

Keep the date of the Boardman fair in mind and bring in your exhibits early. September 3 and 4 are the days of the fair. The board of directors has been working hard and we have prospects of a splendid fair. Lets all pull together and put Boardman on the map.

Several of the farmers are planning to put in a small acreage of asparagus this fall. Asparagus is one of the most productive crops that can be grown here. The soil and climate seem naturally adapted to it and it usually comes early enough so that it doesn't conflict with other crops and it is one of the best money makers there is. If enough farmers would plant it we could no doubt ship with the Hermiston association eventually and realize good returns on the labor and investment. Let's hear from more of the farmers about it, please.

Boardman friends are having a good laugh both with and at Jack Gorham and Bobby Smith over a stunt pulled by a clever trickster. Jack enjoys a joke that's on him as much as one on the other fellow and this is both. Both Jack and Bobby are demit members of the I. O. O. F. and when a fine appearing elderly man driving a big Packard car and accompanied by a sweet motherly looking woman gave Jack the I. O. O. F. sign and explained that he had lost his wallet containing his money, lodge papers and a valuable mortgage, Jack and Bobby, always polite, were glad to loan a brother in distress the \$15 which would

take him to Spokane, his destination. He would return the money as soon as he reached Spokane. The gentleman was also an Elk and a Mason. Tempting fugits! No money came and Jack wrote to the secretary of the I. O. O. F. and the reply was that this afore-said gentleman of scholarly mein had been having the finest vacation imaginable at the expense of just such good hearted chaps as Bobby and Jack and they were unable to locate him as the game was worked only in the small towns. The pleasant memory is the hearty handclasp and the remark "Well, it certainly is a pleasure to meet a couple of boys like you," and the fact that they were touched for only \$15 when they would as gladly and willingly parted with \$25.

Rip! - he's at it night and day

The villain, Weather, is at his destructive work night and day Give him an inch and he'll take an ell.

Let the tiniest crack appear in the surface—and he's there with both hands to tear down—to let moisture seep in to rot or rust—to let wind blow away—to finally leave ramshackle delapidation.

Surface protection calls for Rasmussen Paints and Varnishes

Money was not invested in homes, and in outbuildings, in factories and warehouses, —to be wasted through carelessness in attending to their preservation

Preservation means, first of all, surface-protection, and surface-protection calls for Rasmussen Paints and Varnishes as often as necessary

Rasmussen surface-protecting products have the qualities that preserve and last—Products that demonstrate the value of finer manufacturing methods and constant testing —for covering capacity —for smooth drying —for wearing qualities —and for finish.

All of which means surface protection and attractive beauty

Choose Rasmussen—USE Rasmussen Paints and Varnishes and the villain, Weather, will never have a chance.
