

BOARDMAN

MRS. A. T. HERREIM, Correspondent.

Greenfield Grange of Boardman proved themselves royal hosts on Saturday when they entertained the Pomona Grange. There was a large attendance and all features were enjoyed by the guests. The program in the afternoon was open to the public and an address by W. A. Dalzell, private secretary of Governor Pierce, was well received. Governor Pierce had been invited to attend but was unable to come so sent Mr. Dasell as his representative. His talk was of a political nature which is to be expected at this time of the year. Bert Zaney, nominee for U. S. Senator was present and spoke very interestingly. Boardman has now heard both the democratic and republican nominees for senator, both men have pleasing personalities, both speak fluently and clearly on the issues of the day, and it would seem that the all important matter of whom to vote for must be decided on the question of voting for principles and not for men, an adage which has become almost obsolete in the last few years. In the evening the Grange held their regular work. A pleasing addition was some hallow-e'en stunts put on by the various Granges represented. A sumptuous dinner was served at noon and another elaborate meal in the evening. Pomona Grange is composed of all the granges in the county and meets every quarter. The irrigator boys' band played several selections. Mrs. Chas. Nizer baked a gorgeous cake for Governor Pierce and sent it to him by Mr. Dalzell. Mrs. Nizer is famous for her fine cakes and Governor Pierce was a fortunate recipient.

So swiftly has improvement followed improvement, that today the car, to all intents and purposes, is a different and incomparably finer vehicle.

The announcement of smart new body lines and attractive color combinations first attracted general favor. But since then, improvements even more fundamental have been accomplished mechanically.

Drive the car NOW! Observe its impressive new silence, smoothness and elasticity of performance, and you will then begin to realize just how vital and varied these and other later improvements actually are.
