Efficiency DOWN the road it travels, one of the most efficient things on wheels. Coils of wire are stored inside. Tools are in the snug lockers. Pike poles and shovels are in their racks. A big winch is bolted to its frame and there are pipes of steel from which to form a sturdy derrick. Sometimes it draws a trailer loaded with long, straight poles. Sometimes it bears a heavy reel of cable. Often its load is men. The telephone truck gets many a glance as it passes. For whether on the peace-time job of construction and maintenance or bound to where snow and sleet have made for it a battle ground, it means power, speed, efficiency, economy and human loyalty, united in the task of making telephone service better, broader, more dependable.
