### P. T. A. HOLDS ELECTION.

The monthly meeting of the P. T. A. was held Tuesday, for the purpose of electing officers for the coming year. The program was in charge of the sixth grade, who carried out an Indian scheme very effectively. The girls and boys both participated in singing "Fallen Leaf," an Indian love song, and then the girls, dressed as Indian women, danced and sang to weird Indian music.

Miss Nelson spoke on the subject of "Girl Reserves," and Mrs. McDuffee on "Education for Citizenship." Officers elected were Mrs. Roger Morse, president; H. R. Johnson, vice president; Miss Hester Thorpe, secretary, and Mrs. E. H. Buhn, treasurer.

The sixth grade received the \$5 prize for having the largest number of parents and friends representing them.

The art exhibit held at the school house last month was a success for the school. All of the students and many of the parents saw the exhibit. It was sent to other schools after being shown here.

Mary Patterson who is taking a post-graduate course in shorthand is assisting with the office work for Mr. Burgess.

Joe Brosnan and Jack Casteel are victims of chicken pox. Joe has been absent from school for a week while Jack has been ill since Monday.

Gerald Swaggart has dropped school for the remaining part of this semester. It is thought, however, that he will begin again in September.

Miss DeLoris Pearson went to La Grande for a week-end visit to her parents and many friends.

Baseball seems to be here to stay judging from the bunch of boys that

gather out on the Rodeo field every evening after school. There has been no organized practice yet, but Coach Johnson says that they will start work in earnest the first of next week.

### H O A X.

### Freshmen Sell Hot Dogs.

The freshmen are fast getting a reputation for the selling of delicious hot dog sandwiches. Last Wednesday the demand far exceeded the supply, so many went hungry. Another sale was held at noon today.

### GRADE NEWS.

The seventh grade purchased the following books with the \$5 given them by the P. T. A.: Barnaby Rook; Huckleberry Finn; Mark Twain; Theodore Roosevelt's Letters to His Children; James Otis; The Trail of the Sand Hill Stage; Seteen.

The seventh grade is preparing an exhibit of the products of Oregon to send to the state of Tennessee.

Oral Wright was the only boy of the seventh grade to receive a letter in basketball.

The grade school boys are now preparing to organize a baseball team for this season.

### LARGE DEPOT FOR HARVESTER PARTS

A new brick and concrete building for the Western Harvester company in Spokane, will be finished this month. The building, 180 feet long, will be on Union Pacific railway property and served by the Union Pacific tracks.

The new building provides offices and space for more than two million spare and repair parts for Holt Harvesters, as well as storage for not less than 75 new harvesters. The most modern separation and storage arrangements for the parts are being worked out and H. M. See, who has charge of that division, is now at the factory at Stockton, studying the latest ideas in parts service. The Spokane warehouse, salesroom and depot serves a territory embracing Oregon, Washington, Idaho, Montana, Alberta and Saskatchewan. In this territory

there are more than 3,000 Holt harvesters in use.

The Western Harvester company, owned entirely by the Caterpillar Tractor company, is a three-million-dollar corporation with offices at Stockton, California. Mr. A. S. Weaver is president, and E. A. Amy of The Dalles is representative for this district.

Dr. Clarke, of the Clarke Optical Co., Eye Sight Specialists, 304 Salmon St., Portland, Ore., will be in Heppner for the day and evening, Tuesday, March 22nd, on his regular monthly trip. Headquarters at Hotel Heppner. See him about your eyes.

### SEED POTATO TREATMENT.

Seed potato treatment for the prevention of diseases is recommended by all authorities on potato growing. The best and most common practice in treating seed in small quantities is to use the corrosive sublimate treatment. This is done by dissolving 4 ounces of corrosive sublimate in one gallon of hot water. This is then added to 29 gallons of water and 4 sacks of uncut potatoes soaked for 1 hour, 1 1/2 hours, 2 hours and 3 hours.

The treatment should be done in a wooden container only, as the corrosive sublimate corrodes metal. Potatoes should be treated before being cut and should be allowed to drain and dry off after being treated.

Corrosive sublimate is a deadly poison and care should be used to keep it away from livestock and children. This treatment controls potato diseases such as Rhizoctonia and Scab. There is no treatment, except seed selection, that will control the so-called virus potato diseases such as Mosaic.
