

**U. P. DAIRY SPECIAL
TO VISIT BOARDMAN**

Demonstration and Program Scheduled for April 8, at 8 A. M.

A modernized farm demonstration train manned by O. A. C. specialists and sponsored by the Union Pacific system will tour eastern Oregon lines of that company, visiting 18 towns the week of April 25 to 30. "The Dairy Profits Special," as it is called will visit Boardman at 8 a. m. and irrigate at 10:30 a. m. April 27, when brief lectures and demonstrations will be given as a means of encouraging a more profitable dairy industry in this country.

As the special enters Morrow county, Roger W. Morse, county agent, will join the party and remain with it as long as the train is in his district, thus insuring that the program will be localized to the greatest advantage of farmers in this county. The program as tentatively outlined, subject to local changes, is as follows:

Opening remarks by C. C. Gignoux, assistant supervisor of agriculture for the Union Pacific system; "Relation of the dairy special to the county extension program," County Agent Morse; cattle demonstration by breed representatives; "Place of Dairying in Irrigation Farming," N. C. Jamison, specialist in dairying; second cattle demonstration; "Management Pointers, Including Marketing," P. M. Brandt, chief in dairy husbandry, O. A. C.; third cattle demonstration; "The Place of Hogs on the Dairy Farm," H. A. Lindgren, specialist in animal husbandry; inspection of cattle and exhibit car. Dr. H. C. Donham, veterinarian from the college, will also be along to give information in his field.

The train will be made up of seven cars, including a dynamo baggage car to furnish electricity, two special horse cars to house dairy stock and swine, a flat car equipped with canopy top to use as a demonstration and speaking platform, a day coach for display of extensive charts and other exhibits, a dining car and sleeping car for use by the party.

Three breeds of dairy cattle will be taken along on the trip and will be in charge of their respective breed representatives. Provision is made so cattle can be led directly from the cars to the flat car for demonstration purposes.

One side of the display coach will be taken up by the complete exhibit of the dairy and veterinary departments of the college prepared at the state fair last fall. This exhibit, which attracted wide interest then, deals with control of contagious abortion, mineral requirements of dairy cattle, sterility, and related matters. Dr. Donham will be in personal charge at all steps. Newly prepared charts dealing with relative economy of irrigated pastures will be shown in this car as well as other charts dealing with profitable dairy practices. From two to three hours will be spent there by the train. The complete itinerary of the train follows:
