Thinking.

PROFESSOR JAMES KENNEL, Dean of New York University, says scientists take too much for granted that strange substance, water, which we understand "as little as we understood oxygen 150 years ago."

Because of vast distances inside that drop, you would need a telescope. With it you could see inside of the atom electrons revolving around a nucleus at the center of each atom TRILLIONS OF TIMES A SECOND.

We harness and use the electric, but don't know what electricity is, while we create it artificially with falling water or burning coal.

Shocking the Soil.

DONALD WOODWARD, at LeRoy, N. Y., is experimenting with a plow that enriches the earth by plowing into it a high electrical voltage as the plow moves through the field.

THINGS WILL TAKE A TURN

"I would rather be dead than a failure," said Belle Anderson, a thirty-year-old post graduate student at the University of California Hospital the other day.

Advertising.

ADVERTISING and not competition is now the life of trade, according to the advertising experts who met in Denver to attend the International Advertising association convention.

It is now generally admitted by economic forces everywhere that advertising is the most important development of modern business.

Some people are like watermelons. They may be green on the outside but are the real thing underneath.

Laugh and the world laughs with you. Smile—and you're called a flirt.

People like the man with courage enough to stand up and say what he thinks—providing he thinks their way.

It is reported that Reggie Vanderbilt has spent thirty million dollars in twenty years—and yet we have never heard that he ran a newspaper—or backed a show troupe.

The Ideal Maid Mistress—Can you serve company? New Maid—Yes; either way. "Either way?" "Yes, ma'am; so's they'll come again, and so's they won't."
