MAN has ever symbolized speed by devising such phrases as "Quick as a Flash" and "Wings of the Wind".

By the same token, the transmission of thought by speech can well be compared with the speed of light. For, truly, your voice by telephone to nearby or distant points, travels with the speed of light—instantly.

Long Distance telephone service to over 70,000 cities and towns in the United States and now to England, Scotland and Wales, places millions of people within reach of your own voice—with speed, economy and efficiency.
