

BOARDMAN

After spending the past five or six weeks at Grandview, Wn., slapping apples into their proper jackets and thence into their boxes, Mrs. A. T. Hereim has returned and again resumed her post as local correspondent for the various newspapers. The apple crop is exceedingly short this year in the Yakima valley, and fortunate is the farmer who had apples to pack. An orchardist has even more trials and vicissitudes than a farmer on the Boardman project for in addition to spraying incessantly and paying to have arsenate of lead put on the apples he must at harvest time pay to have the apples bathed with a solution of muriatic acid to remove all of the arsenate of lead, and another bath must remove the muriatic acid and soda, then they must be dried in some manner before they are ready for the sorting table. This is a costly process and when the apples are packed there is always the possibility of poor market. Talk about a gamble and a gambler's chance—he has a sinecure over the farmer.
