

BOARDMAN

The reports from the December tests of the dairy herds of I. Skoubo and Paul Smith were received last week. Smith's best cow brought \$23.13 profit and was a Jersey, by the way. Mr. Smith is a Holstein fancier. The Skoubo herd averaged 30 lbs. of butterfat and Smith's 34 pounds. Both men are members of the Umatilla Dairy Improvement association recently organized at Pendleton. This association is a step in the right direction, toward the improvement of dairy herds, the weeding out of "boarder" cows and the raising of better stock.

Who'll Be Lucky 4-H Club Members In This State?

A national boys' and girls' 4-H club will be held in Washington, D. C., in June, 1928, under the auspices of the United States Department of Agriculture. It has just been announced by C. W. Warburton, director of extension work. This is the second national camp, the first having been held in 1927.

Each state may select two boys and two girls to attend the 1928 camp. The delegates will be accompanied by a member of the State Agricultural Extension service in charge of club work.

These camps are of far-reaching importance to the future of agriculture," Mr. Warburton points out, because they give an opportunity to the

boys and girls about to take their places on the farms of the country to discuss and get first-hand information on farm problems of the various sections.
