WE RECOMMEND HAL.

POLITICS in this latter day has come to be surrounded with much odium. And to call a person a politician is just about as bad as to call him a liar or a thief or whatnot. Lamentable? Yes. But is this not true? This condition, arising from "bossism," underpaid public officials, and other faults in our political machinery, should be remedied. It is true that the most competent men are not as a rule attracted to public office. Hence, it is indeed refreshing to us when a man of real caliber seeks to serve his public, as it marks a blow at the stigma surrounding politics. It is not because of his connection with the newspaper fraternity that this newspaper is backing Hal E. Hoss, who last week announced his candidacy for secretary of state through these columns, but more because through these connections we have learned to know him and believe him to be the type of man who "serves for the love of serving," and who, when he undertakes a task, puts it across. Hal Hoss has served several terms as secretary of the Oregon State Editorial association, making an enviable record in this position. At the present time he is a vice-president of the National Editorial association, showing that his efforts in his chosen profession have been felt not only at home but over the nation. He is a big man, clean-cut, loyal, capable, who is to be highly commended for sacrificing a big place in the journalism world to seek a public office, the glories of which are all too well known. He will make an excellent public official if elected.

FARM RELIEF MAY COME.

THE McNary-Haugen Farm Relief bill was introduced in the senate this week, with Senator McNary of Oregon taking the brunt of upholding it. Whether or not it will be passed is a matter of conjecture only, though Mr. McNary declared in his presentation speech that the bill had been ridded of practically all objections which caused President Coolidge to veto it after its passage last term, and hence should stand a fair chance. That farm relief will be a major issue during the presidential campaign this year is accepted, and if it is not passed at the present session of congress it will continue to be a live issue. Congress may again decide to pass the buck to the President, and Mr. Coolidge not being a candidate, who can tell? Our conjecture is that "Silent Cal" will again veto the bill if it is not as he thinks it should be, regardless. But, sometime, the farming industry will receive the same rights to protection as other industries.

The house committee on irrigation and reclamation has reported favorably on the Umatilla Rapids bill with the recommendation that it be passed. This is the first real ray of hope elucidated from this source since the Umatilla Rapids project has been under contemplation. True, this is not much, as the bill has a long way to go; and again it is a whole lot, as it marks recognition in congress of the project as one of merit and means that it will come some day.

Part of Congress, at least, has admitted that it made a blunder. The house this week passed the bill asking that postal rates be restored to the 1921 basis and it now goes to the senate. Lawmakers, like merchants, some day will see that a small profit on a large volume of sales is to be preferred to a large profit on a small volume. It is just naturally good business.

A dance fiddler claims that he taps his foot half a million times every year. Something should be attached to his shoe to utilize the energy produced!

Among the contenders who claim that they deserve a crack at Tunney is a man with two artificial legs. It seems to us that he hasn't a leg to stand on.

Statistics of the vast number of people who are not working are quite alarming. What we would like to know is how many of them have jobs.

The baseball season is soon to begin, and automatically the mortality rate among grandmothers will mount high.

It is estimated that during May and June about 60,003,659 girls will be told they are the 'only girl in the world."

Somebody, we think it is George M. Cohan, has said: "Silence is the College Yell of the School of Experience."

Who's going to mke up a list of presidential impossibilities?

A novel young noble of Munique
Dressed up in spats and a tunique
This Fashion debasement
Caused unbounded amazement
His ideas were so really unique.

Hints for the Home

by Nancy Hart

Welcome the new tinted damasks, all ye housekeepers! The lesser crinkles and spots that afflict the family table pass almost unnoticed on these charming colored cloths—and this means a great saving of labor, especially where there are little folks.

The pastel tints of the new linens bring a delightful note of color into the dining room, where we appreciate cheerful appointments more than in any other room.

Picture a primrose yellow cloth, a pale green or amethyst cloth as a background for your flowered china. Tempting—isn't it?

Preserving Brooms and Toothbrushes—Soak a new broom in hot salt water. The bristles become stronger and wear longer. New toothbrushes soaked in hot salt water will last twice as long.

For Burns and Insect Bites—Use damp salt to kill the pain of burns, bee stings, insect bites, rash and hives. Moisten the affected part immediately after a burn or sting and cover with a thick paste of salt. This will remove the pain and soreness.

For Gardeners—A little salt added to the water in which they are kept will make cut flowers keep longer. Strong brine thrown around quince trees will cause them to grow and bear in a remarkable way. Salt strewn over asparagus beds, generously, will kill weeds and serve as fertilizer.

Obnoxious weeds may be killed by covering the stalks with salt. Salt sprinkled over the ground will keep down weeds. Snails and earthworms can be killed by sprinkling salt on the sidewalks and damp corners where they thrive.

How to Clean Silver at Once—Fill an enameled ware kettle with water, adding to each quart 1 teaspoon salt and one of baking soda. Keep water boiling, placing in bottom of kettle a piece of new aluminum ware such as a pie tin or lid. Place silver in water so each piece touches the aluminum or another piece of silver in contact with it. Soak 5 minutes, remove silver to hot suds, wash off tarnish and dry.

Prof. (to stude): "I think you would have passed this history if you had paid a little attention."

Stude (aggrievedly): "I paid as little attention as possible, I'm sure."

"Well, I guess I'm all in," grunted Jonah as he finished his subway journey to the whale's interior.

Funny Freshman: "Maybe I didn't cut Jim today."

Gullible Gladys: "Gym who?"

Funny Freshman: "Gymnasium."

What good is the world to a man when his wife is a widow?

Wild Oats! What a multitude of sins is committed in thy name.

"Why don't you ask Tom to lend you that five? I'm broke."

"Well, I did, and he told me to go to the devil."

"What did you do?"

"Naturally, I came here."

Minerva: "What do you expect to do when you graduate?"

Bobby: "Guess I'll turn highwayman and knock people's brains out, and gather up their money and use it."

Minerva: "Why not gather up the brains?"

Estatically the young man heard the girl beside him whisper the delightful words. Quick rushes of joy pulsed thru his frame. He felt a soft pleasant wave pass over his cheek.

It was a Marcel wave.

Dr. Frank Crane Says:

THE BATTLE OF THE BUGS

IN A PAMPHLET called The Forest Printer, issued by the American Tree Association, are some interesting statistics about one of man's greatest enemies.

It appears that there are some two hundred thousand kinds of tree-attacking insects and that these little insects cause far greater losses to forests than do fires.

If unhindered these insects would destroy thousands of acres of valuable forests a year.

In one section of Oregon these pests have destroyed enough trees to build eight thousand homes at $10,000 each.

Birds are one of the best preventives of insects. In a way they are our best friends. Some insects prey upon others, thus protecting the trees.

But man must be constantly vigilant. He must fight the pine beetles, borers, timber worms. Bark beetles attack the trees of the Adirondacks.

The larch is the victim of the saw-fly worm. The pine beetle is well at the top of the list of insect enemies.

In addition to this trees have diseases, although their powers of resistance to disease are greater than their resistance to insects.

Dr. L. O. Howard says that if man does not succeed in combating insects they will destroy man.

One of the greatest insect enemies is the termite or white ant. It penetrates the wood of floors, walls and foundations. Hence we must not only fight to save the lumber, but to save the buildings.

There must be no let-ups in the fight against insects.

We must either pay out more money to protect the forests or pay ever-increasing prices for lumber, and in the end see the forests disappear.

Much has been done in forestry in the last five decades, but much remains to be done, and the care of the trees should be taught in every public school.

Who can fully describe the benefits of the tree? It is not only a thing of beauty that enhances the landscape, but it is useful. We get from it the material for our houses, for many of our utensils, and for many other useful things.

Every town ought to have a municipal forest in its environments and ought to do something for the trees of the country.

First at the get-away
First on the straight-away

No car in the Victory price class can match the all around brilliance of Victory performance.

The Victory is first at the get-away and first on the straight-away—faster on the hills, faster in traffic—smoother on rough roads.

And accelerates as no other car at the price has EVER done: 5 to 25 miles in 7¼ seconds! 10 to 45 miles in 13½ seconds!

The public discovered all this even as the stop watch proved it.

More power per pound of car weight made it possible. Rugged Dodge construction made it practical. And the Victory's unusual design made it SAFE.

For the Victory gravity center is lower and there is no body overhang .... The chassis frame is the full width of the body—and the body sills are eliminated.

Exceptional charm of line and more headroom and seat width are further vital results of this unique construction.

Drive the car today and make your own comparisons!
