What further fear of danger can there be? Beauty, which captures all things, set me free. —Dryden.

TO WASH OR NOT TO WASH

If I were to be asked what constitutes a beautiful skin, I should answer instantly—a healthy one. Health is a primary law of Beauty, and no skin can be healthy unless it is hygienically clean. So the first and universally important role is—Regular and Thorough Cleansing. It simply isn't possible to gauge the number of letters that pour in from time to time, asking me for an expert opinion on the subject of washing the face. Women seem to be swayed so easily from the good, sane, common-sensible ways by sensational advertising or incorrect and inexperienced opinions! To settle all question of washing once and for all, let me say that in the thirty-odd years during which I have acted as confidant and adviser to some of the most beautiful women in the world, I have not come across one dozen instances where the skin was so fragile it would be injured by correct washing. Mind you—I say correct washing. The use of a harsh or alkaline

soap will ruin any skin, eventually. It is only a question of time as to when the protesting tissues will rebel. Complexion Soap, however, is made of the finest oils, and there is one kind in particular which is based on that ancient beautifier, the blended whites of fresh eggs. Such soaps, specially created and carefully perfected, will prove of the greatest value to even the finest skin.

In dealing with an excessively oily skin or one marred by blackheads, whiteheads and pimples, the use of a scientifically compounded face wash, either a good, stimulating blackhead or open pore paste, which incidentally is excellent for refining large pores, or special beauty grains which, through their content and consistency, get right down into the pores, stimulating and cleansing them.

By all means I advise you to wash—but use discretion in your selection of a washing agent. And next week I'll tell you about the cold cream method of cleansing.
