

Breathless was the owner as he watched his birds graded and waited to see whether they went to the 32c pile or the cull pile. Many a fine 20-pound tom was thrown into the No. 2 heap for having a blue neck, leaving the decidedly blue owner standing by. The turkey money meant many things to many people. To some it meant payment of water taxes, to some the payment of the farm loan, to some it meant new pieces of furniture, or to some new clothes, and to Mr. Swayze, the banker at Hermiston, it meant a great deal. People were pretty much dissatisfied but the grading was fair and probably no better results would have been obtained at Portland, and it certainly is an advantage to get one's check the day the birds are delivered and to see them graded. The price was lower than it has been for some time and since the grading was so lenient at the Thanksgiving market and the price high, the contrast was that much greater.

A number of noxious weeds are obtaining a foot-hold on the project

and it is hoped that steps will be taken by the farm owners to eradicate them before they become a public nuisance. Sand burrs are becoming all too numerous, the cockle burr is showing up, the Canadian thistle has virtually taken some fields.

H. A. Lindgren, livestock field man from O. S. C., will be in Boardman Saturday afternoon, Dec. 15, and will speak to the Boardman farmers on sheep, emphasizing diseases and management.

County Agent C. W. Smith will discuss pasture grasses, fertilization and display charts showing the results of the fertilization experiments carried on at the Wasmer ranch. The meeting will be held at Roots hall.

Mr. and Mrs. J. H. Imus arrived Sunday for a visit at the George Gross home. They have been to Everett, Wn., and other places of interest.

The utilities of a city are combined in your motor car

YOUR automobile is something like a miniature city. There is an electric light and power system, a water system, a fuel system.

been taken to make the distributor water-proof, thus preventing short circuits from rain, etc.

In the new Ford, you will find each of these systems of the latest design and best materials. Every part has been made to serve you faithfully and well at a minimum of trouble and expense.

The entire electrical and ignition systems of the new Ford are so simple in design and so carefully made that they will give you surprisingly little trouble. Yet that doesn't mean they should be neglected. Certain little attentions are needed from time to time.

Take, for example, the generator—one of the most important parts of the electrical system which supplies the current for lighting and for engine ignition.

The storage battery should be given water and the connections kept clean. The generator charging rate should be changed as indicated. Spark plugs should be cleaned at regular intervals. Distributor points should also be kept clean and the distributor cam given a light film of vaseline every 2000 miles.

In the new Ford, the generator is of the power-house type and is distinctive in many features. It has been specially designed to prevent most forms of trouble. Oiling is necessary only once a year. About the only thing you need do is to have the charging rate changed as the seasons change.

These are just little things, but they mean a great deal to your car. You can have them looked after at very small cost by the Ford dealer when you take the car in for oiling and greasing.

Closely allied to the electrical system is the ignition system. It, too, is of new mechanical design in the new Ford. There is but one high tension cable and that connects the coil with the distributor. Even cables from the distributor to the spark plugs have been eliminated.

A thorough checking-up at regular intervals will lengthen the life of your car and give you many thousands of miles of carefree, economical motoring.

Messenger was chairman of this. There were several concessions which proved very popular. Miss Henry was kept busy telling fortunes and was later relieved by Miss Spike. The hit the nigger baby was of interest this year as always. The Oriental dancer was a clever little sell, but the beauty parlor was the most popular place, and many unwilling victims were coerced into undergoing a treatment. Thursday, Dec. 6, will linger long in the memory of the Boardman turkey growers who took their birds to Hermiston to be marketed. It was a cold day and a long, tedious wait. Cars were lined up for a distance of three blocks and there were more turkeys displayed that day than many of us ever saw before. They were brought in trucks, in sedans, roadsters, coupes, even two or three school buses were seen. Some of the birds were neatly tucked in bed with only their feet uncovered, others wantonly displayed an array of purple legs and limp red necks and heads, some were carefully shod and batted with pa-
