We Are All Different and the Clothes Show It

Just think for a moment how different each man is from another. Our own good judgment tells there is a wide distinction. There is no general average for the human being.

And that's just the reason why we should have a merchant tailor make our clothes from quality fabrics. We like nice homes and neat surroundings.

And we want our clothes to look the part. These clothes should be tailor-made. They fit better, last longer, and are more comfortable.

Where is the Hodcarrier?

who used to carry heavy loads of bricks and supplies up ladders?

His lot was hard. All day long he carried heavy burdens. He was paid for only the use of his MUSCLES.

Today, the electric motor and hoist do the work. The man at the switch makes more money than did the hodcarrier because he works with his BRAIN. Electricity is his helper.

Electricity has taken the job from the hodcarrier but it has created a better one.

Developments in the electrical art continue to result in better working and living conditions.

Thousands of improvements in central office equipment in 5 years

In the last five years there have been hundreds of improvements of major importance in telephone central office equipment in the Bell System, and lesser improvements by the thousands.

There is no standing still in the Bell System. Better and better telephone service at the lowest cost is the goal. Present improvements constantly going into effect are but the foundation for the greater service of the future.
