Announcement

No Plymouth Model Changes During Mid-Season

"The fine reception given the Plymouth by the public all over the world indicates very conclusively that the FULL SIZE and quality of the Plymouth car has met with nation-wide approval, which has reflected ever increasing sales.

"We will not introduce new Plymouth models in the middle of the selling season. To do so would cause a loss in your sales volume, which we think is unnecessary as the improvements which have already been made make the Plymouth FULL size car the outstanding value in its price field.

"Further, we wish to very clearly state that the Plymouth product will be continued as a high quality FOUR CYLINDER motor car embodying manufacturing principles which give the Plymouth owner full quality transportation at low cost with long dependable life and economical maintenance and operation."

The above is quoted from a letter received from A. van Der Zee, General Sales Manager of the Plymouth Motor Corporation, and is only given to the public at this time to counteract local propaganda to the effect that Plymouth is going to make a model change during the selling season.
