## Compound Interest

—A Force That Can Build A Bigger Sum Than You Can Earn.

Money has a magic power. And when Compound Interest is considered, the magic is increased. Money invested will work twenty-four hours of the day and 365 days a year. Invested at 6 per cent, money will double itself in the course of eleven years.

Invest \$100 at the age of 20 and with the power of Compound Interest, the \$100 will be \$1600 at the time you are 64. Your \$100 has transformed itself into \$1600 in forty-four years.

Come in and have a chat with our officers. They will gladly show you how to put the magic of Compound Interest to work in our Savings Department—how you can have a substantial sum of cash at your command in one, two or five years' time.

# Announcement

## No Plymouth Model Changes During Mid-Season

"The fine reception given the Plymouth by the public all over the world indicates very conclusively that the FULL SIZE and quality of the Plymouth car has met with nation-wide approval, which has reflected ever increasing sales.

"We will not introduce new Plymouth models in the middle of the selling season. To do so would cause a loss in your sales volume, which we think is unnecessary as the improvements which have already been made make the Plymouth FULL size car the outstanding value in its price field.

"Further, we wish to very clearly state that the Plymouth product will be continued as a high quality FOUR CYLINDER motor car embodying manufacturing principles which give the Plymouth owner full quality transportation at low cost with long dependable life and economical maintenance and operation."

The above is quoted from a letter received from A. van Der Zee, General Sales Manager of the Plymouth Motor Corporation, and is only given to the public at this time to counteract local propaganda to the effect that Plymouth is going to make a model change during the selling season.

Ford dealers' selling prices  
on  
**USED CARS**  
are low

Why not get a used car for the second car your family has been needing? Most of the cars we have accepted for trade-in on new Fords have a generous number of miles left in them—miles of unused transportation at a price you can easily afford.

You'll find our used-car prices low because there is no "price-padding" to make up for high trade-in allowances. The price of the Model A Ford is so low, and the value so high, that excessive trade-in concessions are impossible. That, and our reputation for fair-dealing which we value so highly, protect you when you buy a used car from us.

When we offer a Model T Ford for resale it has been thoroughly reconditioned. New parts wherever needed; everything properly tightened and adjusted—and with it goes a guarantee. We have a number of these reconditioned Fords now. Also several cars of other makes, priced according to the unused transportation they offer. Let us prove our prices. Stop in today and look over these bargains:

3 Model T Coupes, Priced from \$100 to \$225  
1 Dodge Touring .....\$150  
3 Model T Tudor Sedans .....\$100 to \$275
