

U.-O. Data Available To Entering Students

University of Oregon, Eugene, Sept. 3.—Unusual opportunities in all schools and departments, with many offering new courses in the newest fields this year, are to be offered high school graduates of Heppner who are planning to come to the University of Oregon, it is announced by Dr. Arnold Bennett Hall, president. Students who have not yet sent in their high school credentials to the university registrar at Eugene are urged to do so at once so they can be properly checked and the necessary information sent to each entering student, Dr. Hall states.

For prospective students who have not yet decided what they wish to take up, the university has prepared a series of booklets, in addition to the general catalogues. New booklets in this series include those on law, business administration, education, journalism, and others. Students in writing for information should specify the lines of work in which they are interested.

Booklets of special interest just issued by the university editor include one on "Success in College," which outlines the daily life and problems of students on the campus, and "Expense and Self Support at Oregon," which is a detailed account on actual cost of university attendance. It will be found that the average cost, including board and room, books, fees, and incidentals varies from \$530 per year to \$795. Many students who are self-supporting actually live comfortably on less than the low average, however. Eugene, one of the larger and more prosperous cities of the state, also offers unusual opportunity for work to the student who must make his own way, it is pointed out.

University officials and students alike are looking forward to the best and most progressive year in the history of the institution and all are preparing for a busy and enjoyable three terms. Patricia Mahoney, Heppner high school graduate, has sent in her credentials and has been accepted for entrance to the university.

New developments usually have some unconsidered effects. Just now the experiment station scientists are blessing the man who invented waxed bread paper wrappers. Farmers are using them more and more in sending in specimens for identification, with the result that these are arriving in better condition than ever before as the air is excluded in transit.

Having kitchen working surfaces, such as sink, tables, etc., too low causes undue stooping and means a strain on arms and shoulders. Much of this equipment can be raised to the proper height by the use of blocks of wood fastened to the legs.

And she is fair... her sunny locks Hang on her temples like a golden fleece. —Shakespeare.

The Care of Blonde Hair

Have you ever realized how many different kinds of hair there are—and that all need different care?

Basically, of course, the care of all hair is the same. The proper care is health care, and the health of the hair depends largely upon the general health of the body. It requires good circulation—which means massage and brushing. And it requires cleanliness, which means proper shampooing and more brushing.

Heads of different colors need different types of shampoos and rinses. Blonde hair, especially, must be carefully washed and rinsed to preserve its natural color and beauty.

Of all hair, I think naturally blonde hair can be the loveliest. Whether it is a pale, silver yellow or tawny gold, or a soft, ash blonde, fair hair has about it something rare and lovely which sets it apart from the browns, reds and blacks of the dark-haired world, and makes us think of fairy tales and princesses.

Really golden hair is something to live up to, because it is the rarest of all. Children often have it, but often, too, it darkens as they grow older. The golden-haired woman who stays golden-haired until she is gray or silver, usually takes wise care of her hair.

Here are some of the rules she follows, in company with all her blonde-haired sisters:

She never washes her hair with tar soap or uses sage tea or an oily, dark hair tonic, since these are bound to be darkening. Instead she shampoos with a light, liquid shampoo. You may make one at home by dissolving a cake of pure Castile soap, sliced fine, in a quart of boiling water. Let it simmer until the soap is thoroughly dissolved, then put the jelly in a jar and use a little for each shampoo.

If the blonde-haired girl's scalp is dry and she needs a pomade or tonic to use as a massage, she uses a pure white cream, or a little mineral or castor oil mixed with cologne water.

To keep her hair light and fluffy she may use occasionally a teaspoon full of baking soda dissolved in the liquid shampoo; or at the end of the shampoo, a rinse made by mixing one teaspoonful of salts of tartar and two teaspoonfuls of strained lemon juice with three pints of water.

Camomile tea also makes a good

rinse, especially for the Titian blonde. To make it, use ten cents worth of the tea boiled in a pint of water. Strain and apply evenly to the hair, leave on a few minutes, then rinse in tepid water.

HARDMAN.

Mr. and Mrs. Walter Farrens have recently returned from the Tindal Robison ranch where they have been employed during the harvest season.

Mrs. Anna Harshman and children of Eight Mile were calling in Hardman one day this week.

Verl Farrens who has been working on the Joe Hayes sheep ranch near Heppner visited friends and relatives here Saturday and Sunday.

Miss Mildred Farrens and Miss Lucy Williams are at home again after having spent the summer at La Grande normal school.

Clyde Wright is making his attractive Rhea creek home modern with a new Delco light plant, being installed by W. F. Mahrt.

Mr. and Mrs. Bert Bleakman and family and Mrs. Mary McDaniel

visited in Boardman this week and attended the Irrigon fair on Saturday.

Mr. and Mrs. W. F. Mahrt and daughter Leah Katherine spent Saturday at Irrigon.

Mrs. Blaine Chapel and Miss Louise Torre were shopping in Heppner Saturday.

Lois Adams was a visitor in Boardman and Irrigon this week. Zetta Bleakman arrived home last week from Spirit Lake, Idaho, where she spent a pleasant vacation.

The new Fun-Ful playground apparatus added much to the happiness of our first days at school. It is certainly appreciated and enjoyed to the fullest extent.

We are very proud of the fact that Hardman was represented at the Irrigon fair. Fred Mahrt car-

ried off two blue ribbons, having had the best Earliest of All potatoes and Early Flat Dutch cabbage exhibit. Owen Bleakman won the highest award for his garden club exhibit which gives him a scholarship to the Oregon State college summer school for 4-H clubs.

Neva Bleakman won second place in the garden club and Muri Farrens took second prize on the division three sewing club exhibit.

It is said that only thirty per cent of the American families have radios. But some nights we are confident that all of them are in our neighborhood.

The copper carbonate dust treatment for wheat gives very satisfactory control of stinking smut in Oregon. It is not injurious to the

germination of the grain and can be applied at any time prior to seeding, according to the experiment station. The irritating effects of the dust on the person applying it can be largely

overcome by the use of an open shed in which to make the application. Plans for a home made machine for applying the dust can be obtained from the college.

WHEN THERE'S A CHILL IN THE AIR—

What Will You Do?

When it is cold and dark without—perhaps stormy, and Jack Frost is painting beautiful winter scenes on your window panes—it is time, isn't it, to catch up with your reading?

Don't think that you are taking too many papers, for this selection of popular magazines is being read by the most progressive people. You, too, cannot afford to be without your choice of the following:

- The Ladies' Home Journal
- The Country Gentleman
- American Boy Physical Culture
- Woman's Home Companion
- Better Homes and Gardens
- Delinator Field and Stream
- Good Housekeeping
- Modern Priscilla The Red Book
- Country Gentleman
- American Boy
- Mentor Time McCall's
- Collier's Cosmopolitan Judge
- World's Work Child Life
- Needcraft
- Etc.

Stanley Minor, Agt., Heppner

We Have Arranged with Miss Opal Briggs to Represent us in Heppner.

We are now in a position to give you first class service in Cleaning, Pressing and Laundry. Get in touch with her. Give us a trial. Personal service. Satisfaction guaranteed.
