Smile With Ferguson

IT'S AGGRAVATING to always take things at their apparent face value. A teacher asked her class: "If I were to put my hand in someone's pocket and take the money out of it, what would I be?" One of the tots answered: "That's easy—you'd be his WIFE."

The Slave of Power

CONTRAST the present-day mode of life with that which obtained centuries ago, when human lives were held cheaper than the products of the quarry; when thousands of men were worn out in the erection of the great structures sanding as perpetual protests and reminders of the sacrifices of human energy that went into their making.

Contrast our present age with the days when men were chained as slaves to the galleys, pushing vessels of war and commerce across the seas.

And even in later years—the days when not only men, but women and children toiled out their lives in the mines, factories and workshops of industry.

POWER—electric power—is now taking the place of manpower, and has made toil its slave.
